Acknowledgement

In the journey of research, many people were a great support and they encouraged me for my work. I sincerely would like to express my deep gratitude to all of them.

Firstly, I would like to express my sincere gratitude to my guide Dr. S. U. Jadhavar and my advisor Dr. Sanjay. S. Kaptan for the continuous support of my PhD study for their patience motivation and immense knowledge. Their guidance and advice helped me all the time of research and writing of this thesis. I could not have imagined having a better guide, advisor and mentor for my PhD study.

I would like to thank Dr. Roshan Kazi who provided me with his insightful comments an opportunity to consider the statistics chapter of my research from different perspective.

My sincere thanks also goes to Dr. Mohsen Masoomi for enlightening me in the first glance of my research. Without his precious support it would not be possible to bring this research to an end.

I would like to thank all my kind friends for their presence in the last three years. In particular, I am grateful to my masterful friend Rathi Menon for her stimulating discussions and sleepless nights when he was there for me unconditionally.

Last but not the least, I should thank my family; my patient mother who her love is the most precious and effective support, and my two brothers for upholding me in many different ways throughout writing this thesis and my life in general.
