

LIST OF TABLES

TABLE NO.	TITLE	PAGE NO.
2.1	Ziegler and Nichols Tuning	27
2.2	Parameters of SEPIC	27
2.3	Parameters of experimental setup	35
2.4	Comparison of simulation and experimental results	37
2.5	Comparison of simulation and experimental implementation during line variation	39
2.6	Comparison of simulation and experimental implementation during load variation	41
2.7	Comparison of simulation and experimental implementation during steady state condition	42
3.1	Specification of SEPIC converter	51
3.2	Sample k_p and k_i values	53
4.1	PV Module Specifications	62
4.2	Fuzzy Rule Table	67
5.1	Parameters of SEPIC	92
5.2	Simulated results of the voltage and current of SEPIC without controller for various input voltages	93
5.3	Simulated results of the voltage and current of SEPIC without controller for various loads	93
5.4	Output voltage /current of SEPIC for various input voltages and loads at steady state	97

TABLE NO.	TITLE	PAGE NO.
5.5	List of components	106
5.6	Experimental and simulated output voltage /current of SEPIC for various input voltages and loads	110
5.7	Comparison of simulation and experimental response for line variation	114
5.8	Comparison of simulation and experimental response for load variation	115
5.9	Comparison of simulation and experimental response for components variation	115
6.1	Specification of SEPIC	121
6.2	List of components used in experimental prototype	130
6.3	Input and Output quantities of solar and SEPIC	131
6.4	PV panel output voltage (V_i) and SEPIC output voltage (V_o) in a day	137
7.1	Comparison of coupled and single inductor based PSEPIC	146
7.2	Parameters of PSEPIC	149
7.3	Simulated result in PSEPIC without controller at various input voltages	150
7.4	Simulated result in PSEPIC without controller at load change	150
7.5	Parameters of main circuit	156
7.6	List of control circuit components	159
7.7	Experimental and simulated values of output voltage during Change in input voltage and load	162
