

LIST OF FIGURES

FIGURE NO.	TITLE	PAGE NO.
1.1	Feature selection with strategies	17
1.2	Ensemble classifier	21
3.1	Single algorithm with stochastic search	62
3.2	Single algorithm with partitioned training data	63
3.3	Mixture of algorithms	64
3.4	Individual structure combined by PSO and GA	67
3.5	Input dataset	73
3.6	Comparison of feature selected results	74
3.7	Feature selection accuracy comparison	75
3.8	Comparison of ensemble feature selected results	76
3.9	Ensemble feature selection accuracy comparison	77
3.10	Comparison between feature selection techniques	78
4.1	A typical ANFIS model with two inputs and one output	83
4.2	A basic configuration of a fuzzy system	85
4.3	Fuzzy K-Nearest Neighbor classifier	86
4.4	Heterogeneous ensemble classifier	92
4.5	Average classification accuracy graphs for Heterogeneous ensemble classifier	110
4.6	Average classification accuracy graphs for Heterogeneous ensemble classifier with 10 fold cross validation	110
4.7	Average classification results graphs for Heterogeneous ensemble classifier with 10 fold cross validation	111

FIGURE NO.	TITLE	PAGE NO.
4.8	Average convergence time graph for Heterogeneous ensemble classifier	111
4.9	Average mean square error graph for Heterogeneous ensemble classifier	112
4.10	Average mean square error graph for Heterogeneous ensemble classifier in 10 fold cross validation	112
4.11	Comparison of average classification accuracy	113
4.12	Comparison of average classification accuracy with 10 fold cross validation	113
5.1	Fuzzy based ensemble classification model for Large medical datasets	118
5.2	Mixture of algorithms	132
5.3	Individual structure combined by PSO and GA	137
5.4	Fuzzy K-Nearest Neighbor classifier	145
5.5	Heterogeneous ensemble classifier	147
5.6	ANFIS architecture	150
6.1	Preprocessing results comparison of KNN	157
6.2	Preprocessing results comparison of enhanced KNN	157
6.3	Error results of KNN preprocessing methods	158
6.4	Error results of EKNN preprocessing methods	158
6.5	Preprocessing results comparison of KNN for five dataset	160
6.6	Preprocessing results comparison of enhanced KNN for five datasets	161
6.7	Error results of KNN preprocessing methods	162
6.8	Error results of EKNN preprocessing methods	163
6.9	Feature selection results	164

FIGURE NO.	TITLE	PAGE NO.
6.10	Time comparison for feature selection	165
6.11	Feature selection accuracy	166
6.12	Feature selection accuracy with precision	167
6.13	Feature selection accuracy with recall	168
6.14	Homogenous classification results (FKNN without cross validation)	171
6.15	Homogenous classification results (FKNN with 10 fold cross validation)	171
6.16	Homogenous classification results (FPRNN without 10 fold cross validation)	172
6.17	Homogenous classification results (FPRNN with 10 fold cross validation)	172
6.18	Heterogeneous classification results (FKNN without 10 fold cross validation)	173
6.19	Heterogeneous classification results (FKNN with 10 fold cross validation)	173
6.20	Heterogeneous classification results (FRPRNN without 10 fold cross validation)	174
6.21	Heterogeneous classification results (FRPRNN with 10 fold cross validation)	174
6.22	Heterogeneous classification results (FRB without10 fold cross validation)	175
6.23	Heterogeneous classification results (FRB with 10 fold cross validation)	175
6.24	Heterogeneous classification results (IFRB without 10 fold cross validation)	176
6.25	Heterogeneous classification results (FRB with 10 fold cross validation)	176

FIGURE NO.	TITLE	PAGE NO.
6.26	Heterogeneous classification results (ANFIS without 10 fold cross validation)	177
6.27	Heterogeneous classification results (ANFIS with 10 fold cross validation)	177
6.28	Homogenous classification results of AMSE (FRB with and without 10 fold cross validation)	178
6.29	Homogenous classification results of AMSE (FRB with and without 10 fold cross validation)	179
6.30	Heterogeneous classification results of AMSE (FKNN with and without 10 fold cross validation)	179
6.31	Heterogeneous classification results of AMSE (FRPRNN with and without 10 fold cross validation)	180
6.32	Heterogeneous classification results of AMSE (FRPRNN with and without 10 fold cross validation)	180
6.33	Heterogeneous classification results of AMSE (IFRB with and without 10 fold cross validation)	181
6.34	Heterogeneous classification results of AMSE (ANFIS with and without 10 fold cross validation)	181
6.35	Homogenous classification results of time convergence results (FKNN)	182
6.36	Homogenous classification results of time convergence results(FRNN)	183
6.37	Heterogeneous classification results of time convergence results (FKNN)	183
6.38	Heterogeneous classification results of time convergence results (FKNN)	184
6.39	Heterogeneous classification results of time convergence results (FRB)	184

FIGURE NO.	TITLE	PAGE NO.
6.40	Heterogeneous classification results of time convergence results (IFRB)	185
6.41	Heterogeneous classification results of time convergence results (ANFIS)	185
