ACKNOWLEDGEMENTS

I would like to express my deepest gratitude to Prof. V.V. Krishna (Chairman, Centre for Studies in Science Policy, Jawaharlal Nehru University) for guiding me at each stage of my Ph.D. project. Not only did Prof. Krishna inspire me to take up the project, he kept the pressure alive right till the end to ensure that I put in nothing less than my very best. His advice and guidance at each stage gave the necessary direction and impetus to my work.

My special thanks are due to Dr. Madhav Govind and Dr. Rohan D’Souza of the Centre for Studies in Science Policy for taking me through the last stages of my project by painstakingly going over my work and offering valuable suggestions.

I am grateful to all the faculty members of the Centre for Studies in Science Policy and would like to thank them particularly for their insightful interventions during my presentations. I would like to thank Dr. S. Bhaduri for sparing his time for discussions.

My list of acknowledgements would be incomplete without mention of some of the former members of faculty, Prof. Nasir Tyabji, Prof. Ashok Parthasarthy and Dr. K. Joseph. The discussions held with them at the initial stages were crucial in bringing about conceptual clarity and building the framework of my project.

I would like to profusely thank Prof. S. M. Ishtiaque of the Indian Institute of Technology, Delhi. I gained immensely from his scholastic knowledge as well as his practical insight into the Panipat textile industry.

Discussions with Prof. Holmstrom from School of Development Studies, University of East Anglia and Prof. Cedene of University of Paris VII at the initial stages were very useful for which I would like thank them.

My special thanks are due to my young fellow scholars, whose affection and concern kept my enthusiasm and morale alive. Thanks are also due to the administrative staff of the Center, especially Ms. Syamala Krishnamurthy and Ms. Meena Ahuja for their warm and cheerful support.
The empirical work for this thesis would not have been possible without the ungrudging support of a very large number of individuals from the world of academics, industry and Government institutions. I would like to thank all those whose names appear in the list of resource persons. I would like to express my special gratitude to Mr. Pravin Garg and Mr. B.S. Chauhan without whose assistance my fieldwork could not have been completed.

I would also like to put on record my special thanks to the innumerable artisans, craftsmen, suppliers, and others with whom I interacted on an informal basis and who gave me a rare insight into the functioning of the two clusters that formed the basis of the empirical framework of my thesis.

I will be failing in my duty if I do not thank the Governing Body, Principal and the Members of Economics Department of Janki Devi Memorial College for their support and encouragement.

I feel that my work would not have taken off at all without the support of my mother who remained a source of inspiration for all her children in all their pursuits in life. Her absence today dilutes the joy of completing my project. But I am happy to present my work to my father who has been a constant source of strength.

My project would have remained incomplete without the unconditional love and affection of all my children. The involvement of my sons Chinmoy and Amit in my work from a distance of thousands of miles and their belief in me kept me going. The day to day monitoring by the younger children of the family kept me on my toes as did the fear of letting them down. Support provided by Meenu and Sunil was invaluable in more than one ways.

I will be belittling the efforts of all the sixteen members of my family by merely thanking them for I know that it would not have been possible for me to complete this journey without their holding my hand throughout and beyond.

Mohini Gurlajanid
