

LIST OF FIGURES

| FIGURE NO. | TITLE | PAGE NO. |
|------------|--|----------|
| 1.1 | Signal propagation range | 3 |
| 1.2 | Shadowing | 6 |
| 1.3 | Reflection | 6 |
| 1.4 | Refraction | 7 |
| 1.5 | Scattering | 7 |
| 1.6 | Diffraction | 7 |
| 1.7 | Cellular networks structure | 10 |
| 1.8 | Ad hoc network structure | 11 |
| 2.1 | Types of location services for multicast routing protocols | 32 |
| 2.2 | Classification of multicast routing protocols | 35 |
| 2.3 | Classification of QoS routing protocols | 41 |
| 2.4 | Classification of energy efficient multicast routing protocols | 43 |
| 3.1 | Zone based group architecture | 71 |
| 3.2 | Range based group architecture | 73 |
| 3.3 | IPv4 Header format with GPS information | 76 |
| 4.1 | Hidden and exposed problem | 81 |
| 4.2 | Basic CSMA/CA mechanism | 90 |
| 4.3 | Reliable recovery ICTS mechanism | 98 |
| 4.4 | The reliable packet transmission flow diagram | 100 |
| 4.5 | Packet delivery ratio versus moving speed | 103 |
| 4.6 | Control overhead versus moving speed | 104 |

| FIGURE NO. | TITLE | PAGE NO. |
|-------------------|---|-----------------|
| 4.7 | Average path length versus moving speed | 105 |
| 4.8 | Average joining delay versus moving speed | 106 |
| 4.9 | Packet delivery ratio versus node density | 107 |
| 4.10 | Control overhead versus node density | 108 |
| 4.11 | Average path length versus node density | 109 |
| 4.12 | Average joining delay versus node density | 110 |
| 5.1 | Group classification with respect to VRP | 118 |
| 5.2 | Member migration from group D to group B | 120 |
| 5.3 | Secured scalable algorithm | 124 |
| 5.4 | New group construction with existing groups | 125 |
| 5.5 | Communication flow of appendix packet | 126 |
| 5.6 | Packet delivery ratio versus group size | 131 |
| 5.7 | Control overhead versus group size | 132 |
| 5.8 | Average Path length versus group size | 133 |
| 5.9 | Average joining delay versus group size | 134 |
| 5.10 | Packet delivery ratio versus number of groups | 135 |
| 5.11 | Control overhead versus number of groups | 136 |
| 5.12 | Average path length versus number of groups | 137 |
| 5.13 | Average joining delay versus number of groups | 138 |
