Acknowledgement

This research would not have been possible without the help and support of several groups of people. When I started I didn’t have any idea about a research work and the value of having a supervisor and I see that now. Without the help of my supervisor Professor Anurup Gohain Barua, present HOD, Physics Department, G.U., it would not have been possible. I am indebted to him for taking me on, supporting me and giving me advice which made my research work possible. I am very grateful to him for his patience, motivation, enthusiasm and immense knowledge in the field of atomic and molecular Physics that, taken together, make him a good mentor.

This research work also owes a huge debt to my parents – for doing little things, like raising me, supporting me and teaching me the value of an academic life – especially my father Mr. Krishna Kanta Phukan for constantly reminding me my duties. I will remain indebted to my husband Dr. Mridupawan Saikia for his constant support and help in preparing the thesis. Without his support and inspiration it would not have been possible for me.

I would like to thank Prof. N. Nimai Singh, former HOD, Physics Department, G.U., for approving me and allowing me to work in this department. I have gained quite a lot from the interactions with all the faculty members of Physics Department, G.U. at different time. My thanks are also due to my classmate Dr. M. P. C. Kalita and Dr. B Sarmah for giving me advice in my research work.

I am also grateful to my research colleagues for their help in doing the experiments. I am also grateful to a group of people of Physics Department, G. U., who caught firefly for me at the evening hours. I am extremely grateful to Dr. Aswini Barua, Principal, Nits Mirza, Kamrup for giving me permission to do research work by managing my college duties. I am also grateful to my colleagues specially Dr. Subhasit Bora and Dr. Debasish Sarmah who helped me in collecting journal from various source that are required for my research work. Finally I want to give my thanks to all of my
friends who encouraged me throughout the period of my research work till completion by giving some valuable advice.
