

## LIST OF TABLES

---

<i>Table 3.1: Fitting parameters found from positron annihilation life measurement on Mn Doped ZnO samples</i> .....	80
<i>Table 3.2: Fitting parameters found from positron annihilation life measurement on Co Doped ZnO samples</i> .....	80
<i>Table 3.3: The band gap energy for the Co doped ZnO samples</i> .....	91
<i>Table 3.4: The band gap energy for the Mn doped ZnO samples</i> .....	91
<i>Table 4.1: The refined lattice and structural parameters for <math>Ti_{1-x}Co_xO_2</math> (<math>x = 0.00, 0.05</math> and <math>0.10</math>)</i> .....	107
<i>Table 4.2: The band gap energy for the Co doped <math>TiO_2</math> samples</i> .....	118
<i>Table 4.3: The band gap energy for the Mn doped <math>TiO_2</math> samples</i> .....	118
<i>Table 5.1: Crystallographic data for pure ZnO, <math>Zn_{0.95}Co_{0.05}O</math> and <math>Zn_{0.90}Co_{0.10}O</math> samples, obtained using the Rietveld refinement of the powder X-Ray diffraction pattern at 300K</i> .....	133
