Acknowledgements

This thesis dissertation marks the end of a long and eventful journey for which there are a lot of people whose contribution in assorted ways to the making of this thesis deserved special mention. It is a pleasure to convey my gratitude to all of them in my humble acknowledgment.

In the first place, I would like to extend my heartfelt gratitude to Prof. Alok Bhattacharya. I am extremely fortunate to have the opportunity to work under his supervision. His truly scientist intuition has made him as a constant oasis of ideas and passions in science, which exceptionally inspire and enrich my growth as a student and a researcher. I am indebted to him more than he knows. The freedom to think and execute ideas with his constructive criticism and guidance has helped me take independent decisions. I thank you Sir for all the encouragement and inspiration you gave to me, and the confidence you had in me.

I have been equally fortunate to have the guidance and support from Prof. Sudha Bhattacharya. She has been a very good critic during this thesis. Her unrelenting pursuit for excellence and her suggestions has always helped me bring the best in me. Our common lab meetings and the unmemorable lab trips have proved to be really helpful for me.

I also got an opportunity to work with Dr. Nancy Guillen at Pasteur Institute, Paris. I must acknowledge Nancy for the cordial atmosphere she created to make me feel at home. Her humorous and caring nature and the yearning for perfection was a push force for me to do better and better. The stay in Paris, especially in her lab, was a good learning experience for me. Julien, Christian, Samantha, Elizabeth also need a special thanks for helping me out at every step during my stay.

I wish to thank Jaishree madam. Just the feel of her presence was a big mental support for me. Parties at her home have been real good times. I thank her for all the love and care she has given to me.

I would like to thank Dr. Gourinath for his valuable discussions and his jovial nature. My sincere thanks to Prof. V. Sitaram at Pune University whose teachings, attitude and way of handling a problem has influenced me greatly.

Fellowship from UGC and CSIR is also acknowledged.

I thank the present and the past Deans of School of Life Sciences for their co-operation and the facilities.

Administrative staff of SLS has been very helpful during various needs. Meenu madam deserves special thanks for being so caring and affectionate. Shaimi, Satyavan bhaiya, Ramesh bhaiya, Badole Ji, Mam Raj Ji, Ganguly Ji and all others were very helpful.

I thank the CIF members of SLS, especially Alexander Sir, Khan Sir, Sharma Sir, and Mishra Sir for making things available and their concern. Rajender bhaiya has been a great help with the ultras and Aslam bhaiya also for all the help and co-operation.
All the people who helped me in the imaging experiments reserves a big Thanks from me. I wish to thank Pascal Cossart at the Imaging Platform of Pasteur Institute, for teaching me microscopy and being a very helpful person all through my stay at Pasteur. I am lucky to have a friend like Richa in NII, who was a constant help for me in arranging the confocal microscope for me at NII. The Confocal facility at NIPGR and Department of Botany, DU were also a help for me during the last stages.

I sincerely acknowledge Jeevan Ji, Manoj Ji, Sajjan Ji and Sumer Singh Ji for their help and making things available as and when required. Also I thank to Om Prakash Ji for technical assistance.

Our lab was a second home for me. I have been lucky to get love and affection of my lab mates. I was fortunate to enter an atmosphere where I started the initials of bench work from my excellent seniors. I thank Satish da, Soma di, Para di, Abhijeet, Shweta, Alka and Prabh at for providing the excellent guidance whenever needed. Satish da was a wonderful mentor for me and I am grateful to him for what all he taught me. Nivu di, Divya and Rekha have a separate place in my heart. They were more than mere seniors to me. We spent lots of time together, shared many things. Today also, just their thought is enough to bring tears in my eyes. I miss you all a lot.

I thank my seniors Sudhanshu, Sanghu, Sanjay, Ganesh, Dinesh, Dheeraj Bhaiya, Gopal Bhai for making the stay in SLS enjoyable and memorable. I will miss the dance parties we had in Spandan, the scientific exchanges we had during Biosparks and the help which I got from all of you to have an overall personality development within myself.

Sunit, whom I never really felt a senior was a wonderful friend during this journey. Our scientific discussions and also non scientific were always helpful. His always ready to help and caring attitude has always impressed me. Amoeba culturing has bonded us together even more and I must thank you Sunit for being such a good co-worker.

Narendra and Gagan, my dear batchmates, owes a special mention from me. These guys have kept a healthy and cordial atmosphere around. Discussions with both of them have always been encouraging and motivating for me. Their confidence and faith in me have never let me down. I remember our gossip sessions too, they were simply wonderful. Himanshu, Sidd, Versha and Manju are jewels of my necklace. I thank all of them for being so good friends and making my stay in SLS great.

I thank my present lab mates Krishna, Shiteshu, Vijay, Somlata, Saima, Jitender, Vandana, Abhishek, Sandeep, Hafiz, Shahid, Nishant and Lakshmi madam for maintaining a cordial atmosphere in the lab. Special thanks goes to Shiteshu for reading my manuscript and thesis critically.

Life in JNU has only given me and not taken anything from me. I have learnt a lot and above that I had a handful of friends without whom this thesis would have probably completed but my life would have been hollow. Anchal is like an elder sister to me. Sunny, Vivek and Anchal have been with me when my personal morale was going down. I have a problem, I just think of Anchu and I get a solution. Manish, Inder, Ravinder, Payal are
among those who have always cared for me and never let me feel alone. Ramesh and Amit Verma will always remain special to me.

Ashu has been a great friend to me. I wish him all the success in his life.

Where would I be without my family? Back home I have a big congenial family with Dadaji, Amma Ji, Nana Ji, Nani, Uncles and Aunts. My little cousins have been refreshing and lovely and made my world better. The blessings of elders and the love of the youngsters have made my journey easier and successful.

I wouldn’t have been here without the sacrifices, support, love, care and blessings of my parents. They have been showing me the path and also the confidence in me if I chose a path. Mummy has really supported me in all the phases of my life. She has always enlightened me, I have learnt to be a good home-maker and manager from her. Her unclaimed support has always made me to do things with a confidence. I have learnt to love and live happily from her. Its wonderful to discuss things with papa. He has been an example of hard work and honesty to me. My parents have been a source of inspiration and motivation for me. Bittoo, my younger brother is dearer to me. The love and understanding we share with each other makes me stronger and able to fight with anyone for him. I wish him all the very best in his future and wish he gets all the happiness and success in his life. Aceet, has been a very true friend to me. I think he is the only person who have heard me the most during my Ph.D tenure. My experiment fails or works, I have a problem or I don’t have a problem, I have made him listen everything. His thoughts, his dedication and his love has always kept my life colorful and lively. I thank you dear for being such a wonderful friend and a listener. Whatever I say, will fall short of the feelings that I store for these important people in my life.

Finally, I would like to thank everybody who was important to the successful realization of thesis, as well as expressing my apology that I could not mention personally one by one.

Last but not the least, I would like to thank The Almighty God, for providing me with such good people around and to give me patience and strength to make it happen. I have tried to minimize the mistakes in the thesis but for all those, which still remain, the responsibility is mine.

I promise All of you that the love and affection you have given me will never go in vain. I will try my best to be the Best.

Ruchi Jain
