CONTENTS

Preface i
Acknowledgements ii
Abbreviations vi

1. Introduction 1

2. Review 4

2.1. Mitochondrial Genome of S.cerevisiae 4
  2.1.1. Mitochondrial Mutants 5
  2.1.2. Mitochondrial Genetics 8
    2.1.2.1. Genetic properties of rho+ strains 9
    2.1.2.2. Genetic properties of rho- strains 11
  2.1.3. Mitochondrial Genetic Map 13
  2.1.4. Large rRNA gene and the Molecular Nature of Omega 19

2.2. Mitochondria Mediated Transformation 22

2.3. MtDNA Mediated Transformation 26
  2.3.1. MtDNA Sequences which Function as ARS Elements 27
  2.3.2. Transformation of Mitochondrial Genes 29

3. Materials and Methods 39
  3.1. Chemicals 39
  3.2. Organisms 40
  3.3. Media 42
  3.4. Purification of Lyticase 44
  3.5. Isolation of rho0 Mutants 46
3.6. DAPI Staining 47
3.7. Cytoduction 48
3.8. Isolation of ura+ Revertants from IL8-5C/HIIA2 49
3.9. Replica-Cross Plating 49
3.10 Standard Cross 50
3.11 Isolation of MtDNA 51
3.12 Transformation of E.coli 54
3.13 Mini-preparation of Plasmid DNA 55
3.14 Large Scale Preparation of Plasmid DNA 56
3.15 Restriction Endonuclease Analysis 59
3.16 Agarose Gel Electrophoresis 60
3.17 MtDNA Mediated Transformation 61
3.18 Mitochondria Mediated Transformation 64
   3.18.1. Osmotic Shock Method 64
   3.18.2. PEG-Fusion Method 69
4. Results and Discussion 72
   4.1. Purification of Lyticase 72
   4.2. Mitochondria Mediated Transformation 72
      4.2.1. Osmotic Shock Method 72
      4.2.2. PEG-Fusion Method 77
   4.3. MtDNA Mediated Transformation 83
      4.3.1. Experimental Design 83
      4.3.2. Isolation and Characterization of DC5-0 85
      4.3.3. Construction and Characterization of 5-841 87
         4.3.3.1. Construction of 9-841 88
         4.3.3.2. Construction of 5-841 88
         4.3.3.3. Omega allele 91
         4.3.3.4. Spontaneous CR mutation frequency 94
         4.3.3.5. Effect of CR on spontaneous CR mutation frequency 96
4.3.4. Expression of C~21 in DC5-0 Nuclear Background 99

4.3.5. Characterization of MtDNA Donor Strain 101
  4.3.5.1. Stability of Markers 104
  4.3.5.2. Standard Cross 105

4.3.6. Purification and Characterization of MtDNA 107

4.3.7. Purification and Characterization of YEpl3 DNA 114

4.3.8. Transformation 116
  4.3.8.1. Cotransformation of 5-841 118
  4.3.8.2. Cotransformation of DC5-0 127
  4.3.8.3. Cotransformation: Discussion 133

5. Summary and Conclusions 136

6. References 143
