ACKNOWLEDGEMENTS

I am sincerely thankful and greatly indebted to Dr. Sudha Pai, under whose expert supervision I worked. She went through the various drafts of my thesis meticulously suggesting modifications, corrections and often new insights into it. But for her painstaking guidance, valuable suggestions, keen interest and complete generosity with her precious time, the thesis could not have assumed the present shape. At the satisfactory finale of my thesis, I submit my best regards to her.

I am also particularly indebted to Professor Kuldeep Mathur who really encouraged me to work on the topic and tendered his valuable advice. I am also thankful to Professor S.N. Jha, who has been kind enough to help me whenever I felt his need.

Various Libraries have generously provided me the research material. In particular, I am obliged to the staff of the Nehru Memorial Museum and Library, Teen Murti House, New Delhi; the Jawaharlal Nehru University Library, New Delhi; the Indian Institute of Public Administration Library, New Delhi; the National Council of Applied Economic Research Library, New Delhi; for their co-operation and help
in collecting my research material. I am also obliged to the staff in the Ministry of Petroleum and Chemicals, Department of Chemicals and Petro-Chemicals, Monitoring and Evaluation (Pharmaceutical Industry) Section, for their help in providing statistical data on the drugs industry.

Throughout the long years of my Ph.D. research, I was constantly encouraged by my family and friends. In particular I am extremely thankful to Anilji, Ashokji, Rajendraji and sister Ranju for their emotional support. My senior colleagues and staff at G.T. Government Degree College, Karwi have been a source of moral support to me. I acknowledge my thanks to Dr. Ashok Kumar for doing proof reading. My greatest debt, however, is to my wife Gargi, without whose moral support and patience, it would not have been possible to devote my attention to the thesis single-mindedly.

BIJAY KUMAR BARNWAL
