ACKNOWLEDGEMENTS

It is with great pleasure that I express my sincere gratitude to my esteemed supervising teacher, Prof. Dr. N. R. Menon, Director, School of Marine Sciences, Cochin University of Science and Technology, Kochi, for his invaluable guidance, constant encouragement and the rare degree of intellectual freedom that he nurtures.

I take this opportunity to thank Prof. Dr. Babu Philip, Head, Department of Marine Biology, Microbiology and Biochemistry and Prof. Dr. R. Damodaran, Dean, School of Marine Sciences, CUSAT, for their advice and support.

I am also grateful to the Directors of the Central Marine Fisheries Research Institute, Kochi, Dr. M. Devaraj (Retd.), Dr. V. N. Pillai (Retd.) and Dr. Mohan Joseph Modayil, for their kind permission to complete this work.

I express my thanks to Dr. A. Mohandas, Dean, School of Environmental Science, CUSAT, for facilitating the preparation of the photomicrographs. The scientists and staff of the electron microscopy unit of the Fishery Environment Management Division, CMFRI and the Regional Microscopy Facility, All India Institute of Medical Sciences, New Delhi, have rendered much assistance in the preparation of the electron micrographs. I am very grateful to Prof. Dr. G. G. Martin, Occidental College, Los Angeles, California (USA) for his critical evaluation of some of the electron micrographs.

I thank Shri. C. I. Roy and Shri N. Cherian Punnoose of the Kochi Refineries Limited, Kochi for the supply of crude oil for the experiments.

I thank the boat crew of R V Kingfisher, Shri Shaji of the Central Brackishwater Research Institute, Narakkal and the fishers of Vypeen for their sincere efforts and patience on sample and specimen collection trips. I would like to take this opportunity to pay tribute to their deep understanding of the dynamics of the Vembanad estuary and its biota.

I express my sincere gratitude to Dr. Ajith Kumar, Assistant Professor and my respected in-laws, Prof. Dr. L. Prema and Prof. Dr. R. S. Iyyer (Retd.)
of Kerala Agriculture University, Vellayani, for help with statistical analysis of results.

I gratefully recall the assistance and encouragement given to me by the research scholars and staff of the School of Marine Sciences and the School of Environmental Studies. A special thanks is due to my respected teachers Dr. Rosamma Philip of the School of Marine Sciences and Dr. Bright Singh, School of Environmental Studies, for help and encouragement with the microbiology component. I thank my friends Giri Kumar and Radhika Sehgal for logistic support in New Delhi. And for their infectious enthusiasm, empathy and prompt assistance, Soumya Venkatesan and Dr. Jonathan Wolfe at Cambridge University, U. K. and Anu Idikula at Rhodes University, RSA.

Last but not least, I thank my family for their support and endurance, especially my brother Rajesh Paul Aalapat. My heartfelt appreciation to my in-laws for their encouragement and blessings, my cousin Arun Paul A. C for help with thesis preparation and Unny for assistance with outdoor chores. I apologise to my little girl Shama, for being an absentee mother and not spending quality time with her in her infancy. Words are insufficient to express my gratitude for the affection, understanding and support rendered by my mother, Lalitha Paul and my husband, Lt. Cdr. S. Sreeram.

This thesis has been made possible by the generosity of all those mentioned above.

MIRIAM PAUL
To my beloved Father for bequeathing me with the Joy of Nature
