CONTENTS

ACKNOWLEDGEMENTS

INTRODUCTION

Chapter 1: Approaches to technology and medical technology
1.1 Approaches to Technology
1.2 Approaches to Medical Technology

Chapter 2: Technology, Medicine and Public Health: Historical Perspectives
   Locating medical technology in medicine and healthcare systems
2.1 Growth of Relationship between Technology and Medicine
2.2 Relationship between Technology and Public Health
   2.2.1 Public health in late 18th-19th century – Salient Features
   2.2.2 The 20th century – ‘Scientific’ Medicine & Public Health
2.3 Technological medicine and organization of medical practice and care in the 20th century
2.4 Social Medicine versus Public Health

Chapter 3: Public Health and Development of Medical Care Services in India
3.1 Public Health and Health Services in colonial India
3.2 Overall development framework in India
3.3 Medical and Health services in post-Independent India
3.4 1980s-1990s Structural Adjustment Programmes and Health Sector Reforms
3.5 Characteristics of Private Sector in India

Chapter 4: Conceptualizing the Research Problem and Methodology
4.1 Limitations of the Technological Determinism approach
4.2 Limitations of the social constructivist approach
4.3 Potential of Social Shaping of Technology
4.4 Framework of this study
4.5 Objectives
4.6 Design and Tools

Chapter 5: Development of Medical Technology and the Global Medical Equipment Industry
5.1 Development and Diffusion of Medical Innovations
   5.1.1 Development of Medical Imaging Technologies
   5.1.2 Development and diffusion of extra-corporeal shock wave lithotripsy
   5.1.3 Automated Clinical Chemistry Analyzers
   5.1.4 Development and Diffusion of Pacemakers
   5.1.5 Issues in Development and Adoption of Medical Technology
   5.1.6 Efficacy, Effectiveness and Safety Considerations
   5.1.7 Dissemination of Information about medical technologies

5. II Medical Equipment and Devices Industry
5. II.1 Characteristics of Medical Equipment and Devices Industry
5. II.2 Manufacturing, markets and trade
Chapter 6: Medical Technology and Medical Equipment Industry in India
6.1.1 Policy and Planning for Medical Technology
6.1.2 Medical Technology market & industry in India
6.1.3 Profiles of some companies in the medical equipment sector in India
6.1.4 Manufacture and Import of Medical Equipment in India
6.1.5 Cost of medical equipment
6.1.6 Regulations for Medical Equipment and Devices
6.1.7 Activities of the Industry other than manufacturing and import
ANNEXURE I

Chapter 7: Purchasers and Providers of Technology
7.1.1 Private Medical Care Facilities
7.1.2 Tertiary Hospitals
7.1.3 Private Diagnostic Centers

7. II Medical technology in the government health services
7. II.1 Allocation and Procurement of equipment for public hospitals and institutions
7. II.2 State of equipment in government hospitals
7. II.3 Telemedicine – Medical Technology and Communications Technology

ANNEXURES I & II

Chapter 8: Discussion

285-353
357-404
405-440
