

LIST OF FIGURES

| Figure No | Title | Page No |
|-----------|---|---------|
| 1 | Distribution of SC/ST women students pursuing UG and PG courses | 52 |
| 2 | Distribution of sample according to age and family occupation | 53 |
| 3 | Distribution of sample according to education of father and mother | 54 |
| 4 | Distribution of Mean Total constraint scores among different age and caste groups | 188 |
| 5 | Distribution of Mean Total constraint scores among different family occupation and education level of father | 189 |
| 6 | Distribution of Mean Total constraint scores among the sample with mother's education and course level of the sample | 190 |
| 7 | Distribution of Mean Total constraint scores among the sample pursuing different courses | 192 |
| 8 | Distribution of Mean Total constraint scores among the sample according to type of admission | 192 |
| 9 | Distribution of Mean Total constraint scores among the sample according to residence for the present course as well as at the time of previous course | 193 |
| 10 | Distribution of Mean Educational constraint scores among different age and caste groups | 195 |
| 11 | Distribution of Mean Educational constraint scores among different family occupation and education level of father | 196 |
| 12 | Distribution of Mean Educational constraint scores among the sample with mother's education and course level of the sample | 197 |
| 13 | Distribution of Mean Educational constraint scores among the sample pursuing different courses | 198 |
| 14 | Distribution of Mean Educational constraint scores among the sample according to type of admission | 199 |
| 15 | Distribution of Mean Educational constraint scores among the sample according to residence for the present course as well as at the time of previous course | 200 |
| 16 | Distribution of Mean Personal constraint scores among different age and caste groups | 202 |
| 17 | Distribution of Mean Personal constraint scores among different family occupation and education level of father | 203 |
| 18 | Distribution of Mean Personal constraint scores among the sample with mother's education and course level of the sample | 204 |
| 19 | Distribution of Mean Personal constraint scores among the sample pursuing different courses | 206 |
| 20 | Distribution of Mean Personal constraint scores among the sample according to type of admission | 206 |

| | | |
|----|--|-----|
| 21 | Distribution of Mean Personal constraint scores among the sample according to residence for the present course as well as at the time of previous course | 207 |
| 22 | Distribution of Mean Economical constraint scores among different age and caste groups | 209 |
| 23 | Distribution of Mean Economical constraint scores among different family occupation and education level of father | 210 |
| 24 | Distribution of Mean Economical constraint scores among the sample with mother's education and course level of the sample | 211 |
| 25 | Distribution of Mean Economical constraint scores among the sample pursuing different courses | 212 |
| 26 | Distribution of Mean Economical constraint scores among the sample according to type of admission | 213 |
| 27 | Distribution of Mean Economical constraint scores among the sample according to residence for the present course as well as at the time of previous course | 214 |
| 28 | Distribution of Mean Academic constraint scores among different age and caste groups | 216 |
| 29 | Distribution of Mean Academic constraint scores among different family occupation and education level of father | 217 |
| 30 | Distribution of Mean Academic constraint scores among the sample with mother's education and course level of the sample | 218 |
| 31 | Distribution of Mean Academic constraint scores among the sample pursuing different courses | 219 |
| 32 | Distribution of Mean Academic constraint scores among the sample according to type of admission | 220 |
| 33 | Distribution of Mean Academic constraint scores among the sample according to residence for the present course as well as at the time of previous course | 220 |
| 34 | Distribution of Mean Discrimination constraint scores among different age and caste groups | 223 |
| 35 | Distribution of Mean Discrimination constraint scores among different family occupation and education level of father | 224 |
| 36 | Distribution of Mean Discrimination constraint scores among the sample with mother's education and course level of the sample | 225 |
| 37 | Distribution of Mean Discrimination constraint scores among the sample pursuing different courses | 226 |
| 38 | Distribution of Mean Discrimination constraint scores among the sample according to type of admission | 227 |
| 39 | Distribution of Mean Discrimination constraint scores among the sample according to residence for the present course as well as at the time of previous course | 227 |
| 40 | Distribution of Mean Family support constraint scores among different age and caste groups | 230 |

| | | |
|----|--|-----|
| 41 | Distribution of Mean Family support constraint scores among different family occupation and education level of father | 231 |
| 42 | Distribution of Mean Family support constraint scores among the sample with mother's education and course level of the sample | 232 |
| 43 | Distribution of Mean Family support constraint scores among the sample pursuing different courses | 233 |
| 44 | Distribution of Mean Family support constraint scores among the sample according to type of admission | 234 |
| 45 | Distribution of Mean Family support constraint scores among the sample according to residence for the present course as well as at the time of previous course | 234 |
| 46 | Distribution of Mean Institutional constraint scores among different age and caste groups | 237 |
| 47 | Distribution of Mean Institutional constraint scores among different family occupation and education level of father | 238 |
| 48 | Distribution of Mean Institutional constraint scores among the sample with mother's education and course level of the sample | 239 |
| 49 | Distribution of Mean Institutional constraint scores among the sample pursuing different courses | 240 |
| 50 | Distribution of Mean Institutional constraint scores among the sample according to type of admission | 241 |
| 51 | Distribution of Mean Institutional constraint scores among the sample according to residence for the present course as well as at the time of previous course | 241 |
| 52 | Distribution of Mean Teachers support constraint scores among different age and caste groups | 244 |
| 53 | Distribution of Mean Teachers support constraint scores among different family occupation and education level of father | 245 |
| 54 | Distribution of Mean Teachers support constraint scores among the sample with mother's education and course level of the sample | 246 |
| 55 | Distribution of Mean Teachers support constraint scores among the sample pursuing different courses | 247 |
| 56 | Distribution of Mean Teachers support constraint scores among the sample according to type of admission | 248 |
| 57 | Distribution of Mean Teachers support constraint scores among the sample according to residence for the present course as well as at the time of previous course | 248 |
| 58 | Distribution of Mean Peer group support constraint scores among different age and caste groups | 251 |
| 59 | Distribution of Mean Peer group support constraint scores among different family occupation and education level of father | 252 |
| 60 | Distribution of Mean Peer group support constraint scores among the sample with mother's education and course level of the sample | 253 |
| 61 | Distribution of Mean Peer group support constraint scores among the sample pursuing different courses | 254 |

| | | |
|----|--|-----|
| 62 | Distribution of Mean Peer group support constraint scores among the sample according to type of admission | 255 |
| 63 | Distribution of Mean Peer group support constraint scores among the sample according to residence for the present course as well as at the time of previous course | 255 |
| 64 | Distribution of Mean Neighbours support constraint scores among different age and caste groups | 258 |
| 65 | Distribution of Mean Neighbours support constraint scores among different family occupation and education level of father | 259 |
| 66 | Distribution of Mean Neighbours support constraint scores among the sample with mother's education and course level of the sample | 260 |
| 67 | Distribution of Mean Neighbours support constraint scores among the sample pursuing different courses | 261 |
| 68 | Distribution of Mean Neighbours support constraint scores among the sample according to type of admission | 262 |
| 69 | Distribution of Mean Neighbours support constraint scores among the sample according to residence for the present course as well as at the time of previous course | 262 |
| 70 | Distribution of Mean Government support constraint scores among different age and caste groups | 265 |
| 71 | Distribution of Mean Government support constraint scores among different family occupation and education level of father | 266 |
| 72 | Distribution of Mean Government support constraint scores among the sample with mother's education and course level of the sample | 267 |
| 73 | Distribution of Mean Government support constraint scores among the sample pursuing different courses | 268 |
| 74 | Distribution of Mean Government support constraint scores among the sample according to type of admission | 269 |
| 75 | Distribution of Mean Government support constraint scores among the sample according to residence for the present course as well as at the time of previous course | 269 |
