Acknowledgement

‘Praise the Lord’

‘Creativity is a complex process, whose outcome depends upon forces within the individual and outside’. To lift up this creativity potential I was wholeheartedly supported by some great personalities to whom I must indeed be grateful.

I wish to express my sincere regards and deep sense of gratitude to my guide Dr. (Mrs.) V.S.Tare, Entomology, National chemical Laboratory, Pune; for her valuable guidance throughout the course of this work.

Thanks are due to Principal.R.M.Misal for his constant encouragement and intangible suggestions throughout the endeavor and my colleagues and students and my friends for their kind help and cooperation.

My special thanks to Dr.K.M.Kulkarni, Director, Higher education, Pune and Dr. R. H. Kamble, Deputy Director, Zoological Survey of India, Pune, for their consistent encouragement and inspiration.

I am thankful to Mr.V.B.Tungikar for his valuable guidance and support. I also wish to thank all Entomology staff members of National Chemical Laboratory, Pune especially Dr. Deshpande for his cooperation and kind help.

I am quite overwhelmed while expressing my feelings towards my loving parents and each one in the family for the motivation they have given in the completion of my long awaited dream.

Mr.A.J.Khandagle
(Research student)
