ACKNOWLEDGEMENTS

First of all, I would like to pay homage to my supervisor, Professor (Dr.) Prasant Kumar Das for his acceptance to be one of his scholars whose valuable suggestions brought many tedious task to a definite shape.

With profound reverence and gratitude, I am deeply grateful to Professor (Dr.) Das for his wide knowledge and logical way of thinking which have been of great value for me. His understanding, encouraging and personal guidance have provided a good basis for the present.

It is proud privilege on my part to express my heartful gratitude to Professor (Dr.) Das, a truly studious, a veteran in the field of variational inequalities for guiding and correcting my manuscripts carefully. Further, I offer my extremely thankfulness for his unique character of encouraging rather reacting when I embarrassed him during the research work. I thank him for his expert advice, detailed and constructive comments, timely support and technical guidance throughout this work. His ideals and concepts have had a remarkable influence on my entire dissertation. Without his continual guidance and persistent support, this dissertation would not have been possible.

I pay my sincere thanks to the family members of Dr. Das for their cordial attitude towards the development of conducive atmosphere during the preparation of the thesis.

I owe my special thanks to my beloved wife Mrs. Pallabi Mohanta and my loving son Reyan for their strong support and sacrifice. They have lost a lot during my research period and without their encouragement and understanding it would have been impossible for me to finish this work. Finally, I dedicate the entire dissertation to my parents Mr. Akul Chandra Mohanta and Mrs. Bimala Mohanta.
