ACKNOWLEDGEMENT

I wish to express my sincere thanks to Dr. MASOOD AHMED, my guide for his invaluable guidance and immense help in successful completion of this work. In fact, words are too inadequate to express my gratitude I owe this achievement, to this eminent personality who proved to be a milestone in my life.

I also wish to express my thanks to Prof D M. Uzagare, Principal, Ahmednagar College for his kind consent for registration & to my colleagues for their good wishes with special mention of Late Mrs. Sandhya Bowar for her lively and stimulating discussion.

A research is not merely a mechanical exercise. A lot of inspiration and moral support from well-wishers goes a long way in sparking off the latent potential of a researcher. In this regard, I am grateful to Mr. Javed Bilgiram, Prof. M. S. Bagwan, Mr. Kalim Shaikh and Ms. Mushurruf.

This acknowledgement would be incomplete without the mention of members of my family. I must thank my wife Ms. Rehana for bearing with me during this ordeal inspite of her own research assignment. Perhaps, Wordsworth was prophetic when he said "Child is a father of man". I was reminded of the above quote when my six year old son Faz, going through the pictures of the protozoans put several questions to me, out of sheer childish inquisitiveness which sparked off a serious thought in me and formed the basis of my introductory chapter.

Last but not the least, I am thankful to Mr. M. Abid for active participation in compilation of this thesis.

M. Arif Shaikh
