LIST OF TABLES

CHAPTER V: DIELECTRIC RELAXATION STUDY OF ASAVA
Table 5.1A: Temperature dependent dielectric parameters for Arvindasava + Ethanol mixture.
Table 5.1B: $B_1$ Coefficients obtained by fitting excess parameters to Redlick Kister equation for Arvindasava + Ethanol mixture.
Table 5.1C: Ideal, experimental and theoretical values of Bruggeman factor ($f_0$) for Arvindasava + Ethanol mixture.
Table 5.1D: Activation enthalpy and entropy of Arvindasava + Ethanol mixture for various concentrations.
Table 5.2A: Temperature dependent dielectric parameters for Karpoorasava + Ethanol mixture.
Table 5.2B: $B_1$ Coefficients obtained by fitting excess parameters to Redlick Kister equation for Karpoorasava + Ethanol mixture.
Table 5.2C: Ideal, experimental and theoretical values of Bruggeman factor ($f_0$) for Karpoorasava + Ethanol mixture.
Table 5.2D: Activation enthalpy and entropy of Karpoorasava + Ethanol mixture for various concentrations.
Table 5.3A: Temperature dependent dielectric parameters for Chandanasaava + Ethanol mixture.
Table 5.3B: $B_1$ Coefficients obtained by fitting excess parameters to Redlick Kister equation for Chandanasaava + Ethanol mixture.
Table 5.3C: Ideal, experimental and theoretical values of Bruggeman factor ($f_0$) for Chandanasaava + Ethanol mixture.
Table 5.3D: Activation enthalpy and entropy of Chandanasaava + Ethanol mixture for various concentrations.
Table 5.4A: Temperature dependent dielectric parameters for Chavikasava + Ethanol mixture.
Table 5.4B: $B_1$ Coefficients obtained by fitting excess parameters to Redlick Kister equation for Chavikasava + Ethanol mixture.
Table 5.4C: Ideal, experimental and theoretical values of Bruggeman factor ($f_0$) for Chavikasava + Ethanol mixture.
Table 5.4D: Activation enthalpy and entropy of Chavikasava + Ethanol mixture for various concentrations.
Table 5.5A: Temperature dependent dielectric parameters for Drakshasava + Ethanol mixture.
Table 5.5B: $B_1$ Coefficients obtained by fitting excess parameters to Redlick Kister equation for Drakshasava + Ethanol mixture.
Table 5.5C: Ideal, experimental and theoretical values of Bruggeman factor ($f_0$) for Drakshasava + Ethanol mixture.
Table 5.5D: Activation enthalpy and entropy of Drakshasava + Ethanol mixture for various concentrations.
Table 5.6A: Temperature dependent dielectric parameters for Kanakasava + Ethanol mixture.
Table 5.6B: $B_1$ Coefficients obtained by fitting excess parameters to Redlick Kister equation for Kanakasava + Ethanol mixture.
Table 5.6C: Ideal, experimental and theoretical values of Bruggeman factor ($f_0$) for Kanakasava + Ethanol mixture.
Table 5.6D: Activation enthalpy and entropy of Kanakasava + Ethanol mixture for various concentrations.

CHAPTER VI: MOLECULAR INTERACTION OF ASAVA WITH ETHANOL
Table 6.1A: Temperature dependent dielectric parameters for Panchasava + Ethanol mixture.
Table 6.1B: $B_1$ Coefficients obtained by fitting excess parameters to Redlick Kister equation for Panchasava + Ethanol mixture.
Table 6.1C: Ideal, experimental and theoretical values of Bruggeman factor ($f_0$) for Panchasava + Ethanol mixture.
Table 6.1D: Activation enthalpy and entropy of Panchasava + Ethanol mixture for various concentrations.
Table 6.2A: Temperature dependent dielectric parameters for Lodhrasava + Ethanol mixture.
Table 6.2B: $B_1$ Coefficients obtained by fitting excess parameters to Redlick Kister equation for Lodhrasava + Ethanol mixture.
Table 6.2C: Ideal, experimental and theoretical values of Bruggeman factor ($f_0$) for Lodhrasava + Ethanol mixture.
Table 6.2D: Activation enthalpy and entropy of Lodhrasava + Ethanol mixture for various concentrations.
Table 6.3A: Temperature dependent dielectric parameters for Lohasava + Ethanol mixture.
Table 6.3B: B, Coefficients obtained by fitting excess parameters to Redlich Kister equation for Lohasava + Ethanol mixture.
Table 6.3C: Ideal, experimental and theoretical values of Bruggeman factor ($f_0$) for Lohasava + Ethanol mixture.
Table 6.3D: Activation enthalpy and entropy of Lohasava + Ethanol mixture for various concentrations.
Table 6.4A: Temperature dependent dielectric parameters for Pippalyasava + Ethanol mixture.
Table 6.4B: B, Coefficients obtained by fitting excess parameters to Redlich Kister equation for Pippalyasava + Ethanol mixture.
Table 6.4C: Ideal, experimental and theoretical values of Bruggeman factor ($f_0$) for Pippalyasava + Ethanol mixture.
Table 6.4D: Activation enthalpy and entropy of Pippalyasava + Ethanol mixture for various concentrations.
Table 6.5A: Temperature dependent dielectric parameters for Punarnavasava + Ethanol mixture.
Table 6.5B: B, Coefficients obtained by fitting excess parameters to Redlich Kister equation for Punarnavasava + Ethanol mixture.
Table 6.5C: Ideal, experimental and theoretical values of Bruggeman factor ($f_0$) for Punarnavasava + Ethanol mixture.
Table 6.5D: Activation enthalpy and entropy of Punarnavasava + Ethanol mixture for various concentrations.
Table 6.6A: Temperature dependent dielectric parameters for Ushirasava + Ethanol mixture.
Table 6.6B: B, Coefficients obtained by fitting excess parameters to Redlich Kister equation for Ushirasava + Ethanol mixture.
Table 6.6C: Ideal, experimental and theoretical values of Bruggeman factor ($f_0$) for Ushirasava + Ethanol mixture.
Table 6.6D: Activation enthalpy and entropy of Ushirasava + Ethanol mixture for various concentrations.

CHAPTER VII: CONCLUSION
Table 7.1: Summary of results for Arvindasava + Ethanol, Karpoorasava + Ethanol and Chandanasava + Ethanol mixtures.
Table 7.2: Summary of results for Chavikasava + Ethanol, Drakshasava + Ethanol and Kanakasava + Ethanol mixtures.
Table 7.3: Summary of results for Panchasava + Ethanol, Lodhrasava + Ethanol and Lohasava + Ethanol mixtures.
Table 7.4: Summary of results for Pippalyasava + Ethanol, Punarnavasava + Ethanol and Ushirasava + Ethanol mixtures.
