PREAMBLE

1. Constant State of Flux
2. Factors Regulating Bud Production
3. Regeneration in face of Opposing Gradients
4. Four Types of Morphogens
5. Minimal Cell Quanta for Successful Fragment Regeneration
6. Over-riding Role of Three Cell Types
7. Molecular Events of Regeneration
8. Polarity in terms of Biochemistry
9. Substances Mosaic in Polarity
10. Temperature as an Environmental Cue
11. Sexuality and its Consequence of Depression
12. Depression Amounts to Animated Suspension
13. The Cycle of Depression and Dedepression
14. Analysing the Problem of Depression
