ACKNOWLEDGEMENT

It gives me great pleasure to express my deep gratitude to Dr. V. D. Kelkar, Reader, in Inorganic Chemistry, University of Pune, for his keen interest and valuable guidance.

I sincerely thank Dr. B.A. Kulkarni, Reader (Retd.) in Inorganic Chemistry, University of Pune, for the help and useful discussions while the present work was in progress.

I owe deeply to Prof. Ramkrishna More (President, Poona District Education Association), Mr. Mamasaheb Pimple (Hon. Secretary, Poona District Education Association) and Mr. K.K. Nikam (Asstt. Secretary, Poona District Education Association) for granting me permission to do the research work.

I gratefully express my deep indebtedness to the Head, Department of Chemistry, University of Pune, for providing laboratory facilities.

I would like to extend my thanks to all the teachers, faculty members of Inorganic Chemistry Section, University of Pune, for their guidance and stimulation, all the members of non-teaching staff for their affection and appreciation, all the colleagues of research group for their suggestions and assistance.
I am thankful to Dr. (Mrs) V.R. Sapre (Head, Department of Microbiology, Y.M. College, Pune 411 038) for valuable help tendered to me in antimicrobial studies.

I am very much thankful to Principal, Vice-Principal, staff colleagues of Shri Mhalsakant Junior College Akurdi, Pune, for extending cooperation and providing necessary facilities.

I acknowledge all those well wishers whose encouragement is responsible for the thesis assuming the present form.

I especially thank Mr. K.S. Bapat for the difficult job of typing the thesis.

Last but not the least, I am grateful to my wife and children for their sacrifice and support.

H. R. Gholap
