

## C O N T E N T S

		Page No.
<b>CHAPTER-I</b>	<b>INTRODUCTION</b>	1
	<b>REFERENCES</b>	9
<b>CHAPTER-II</b>	<b>REVIEW</b>	10
II.1	Solar driers	10
II.2	Solar collectors	14
II.3	Simulation model in drying	15
II.4	Economic analysis	16
II.5	Scope for further work	16
	<b>REFERENCES</b>	18
<b>CHAPTER-III</b>	<b>SOLAR DRYING PROCESS</b>	25
III.1	Drying terminology	26
III.2	Parameters in solar drying	26
III.3	Internal mechanism of liquid flow	34
III.4	Drying rates	35
III.5	Types of solar driers	38
	<b>Summary</b>	42
	<b>REFERENCES</b>	43
<b>CHAPTER-IV</b>	<b>DEVELOPMENT OF SOLAR DRIERS</b>	45
IV.1	Terms used frequently in driers	45
IV.2	Natural convection drier	48
IV.3	Forced convection drier	55
	<b>Summary</b>	83
	<b>REFERENCES</b>	84

<b>CHAPTER-V</b>	<b>DRYING OF AGROPRODUCTS</b>	<b>85</b>
V.1	Dehydration of grapes	85
V.2	Drying of dhaniya	100
V.3	Drying of handmade paper	103
V.4	Onion drying	107
	Summary	115
	REFERENCES	117
<b>CHAPTER-VI</b>	<b>INDUSTRIAL DRIER</b>	<b>118</b>
VI.1	Requirements of an industrial drier	119
VI.2	Solar hot air collector	120
VI.3	Design details	124
VI.4	System details	125
VI.5	Drying of custard powder	127
	Summary	141
	REFERENCES	142
<b>CHAPTER-VII</b>	<b>ECONOMIC ANALYSIS</b>	<b>143</b>
VII.1	Terms used in economic analysis	143
VII.2	Economic analysis for Ojhar system	146
VII.3	Economic analysis for Sangli system	148
VII.4	Payback period (Year round operation)	150
VII.5	Economic analysis for Weikfield system	151
	Summary	152
