LIST OF FIGURES

Fig.4A  Different body measurements of *A.mola* (Hamilton- Buchanan)  67
Fig.4B  Mature male of *A.mola*  68
Fig.4C  Mature female of *A.mola*  68
Fig.4D  Maximum size of *A.mola* obtained from culture pond  68
Fig.4E  Juvenile of *A.mola*  68
Fig.5A  Length-weight relationship of female *A.mola*  76
Fig.5B  Length-weight relationship of male *A.mola*  76
Fig.5C  Length-weight relationship of male and female *A.mola* combined  76
Fig.5D  Variation of condition factor (K) for male in different months  77
Fig.5E  Variation of condition factor (K) for male at different length groups  78
Fig.5F  Variation of condition factor (K) for female in different months  79
Fig.5G  Variation of condition factor (K) for female at different length groups  79
Fig.5H  Condition factor (K) for male and female in different length groups  80
Fig.5I  Condition factor (K) for male and female in different months  80
Fig.5J  Variation of Relative condition factor (Kn) for male in different months  81
Fig.5K  Variation of Relative condition factor (Kn) for male at different length groups  82
Fig.5L  Variation of Relative condition factor (Kn) for female at different months  83
Fig.5M  Variation of Relative condition factor (Kn) for female at different length groups  84
Fig. 5N  Relative condition factor (Kn) for male and female in different length groups

Fig. 5O  Relative condition factor (Kn) for male and female in different months

Fig. 6A  Anterior mouth (side view)

Fig. 6B  Anterior mouth showing the width

Fig. 6C  Presence of rough molariform teeth in tongue

Fig. 6D  Head region of A. mola showing gill rackers

Fig. 6E  Relationship between total length of fish (TL) and Total Gut length (TGL)

Fig. 6F  Average Relative Length of Gut (RLG) of A. mola at different size groups

Fig. 6G  Super coiled intestine of A. mola

Fig. 6H  Comparison of major plankton groups found in pond and wet land and their respective presence as food item in the gut of A. mola.

Fig. 6I  Different types of phytoplankton present in the gut of A. mola

Fig. 6J  Comparison of Index of Preponderance (IP) of different food items in the gut of A. mola during various months in culture pond and wet land of Assam

Fig. 6K  Chemical structure of Vitamin A (Retinol and Dehydroretinol)

Fig. 6L  Chemical structure of pro Vitamin A Carotenoids

Fig. 7A  Variation in Proximate composition of fresh A. mola (g/100g) with respect to different habitat.

Fig. 7B  Variation in Proximate composition of fresh A. mola (g/100g) with respect to different spawning seasons
