

Acknowledgments

It is a great pleasure and satisfaction for me to embark on this moment and acknowledge the help of many who in this path tread along with me and has touched my endeavor in their own way. I would like to take this opportunity to reciprocate with my heart felt thanks to all those who have contributed in this effort to bring it to a successful completion.

First and foremost, I would like to express my heart-felt gratitude to my guide, mentor and supervisor, Dr. Debashis Mitra, for shaping me scientifically what I am today. It was a blooming experience of scientific thought process under his able guidance. I would like to take this opportunity to strongly assert at this juncture that with his frankness to absorb ideas he has provided us with the unmatched working independence, which is surely a privilege that I enjoyed in his lab. It was only left for me to convince him logically during the stimulating discussions we have had, to enjoy this freedom. It has also tremendously helped me think independently and take risk. I revere him as a scientist and take privilege and pride in being associated with such a wonderful person during this phase of my career, from whom there is so much to learn, not only about science but also in general about the way of life. I am certain that his training and guidance will help me excel in future. Thanks for helping me at crucial times, keeping faith in my ability and also providing me with opportunities to present myself at international platform.

I am thankful to the Director, NCCS, Shri G.C Mishra for allowing me to work in this premier institute.

All the core facilities of the institute including Library, Washing section, Flow cytometry, Confocal, Sequencing facility, Computer section and the assistant lab boys deserve a special thanks for providing help and assistance whenever required. Thanks to Instrumentation and Maintenance staff for keeping the instruments and equipments in operational state to allow smooth running of the work. I would specially like to thank Sindagi sir, Sandra, Nema, Late Mr. Atul, Ms. Hemangini and Ms. Ashvini for their ever-ready help.

A special word of thanks goes to Dr. Sutapa for being such a warm, caring and compassionate person. I would also like to thank Dr. Samit, Dr. Sahu, Dr. Jayati, Dr. Bhat, Dr. Patole for their help with reagents and constructive criticisms. Thanks are due to Dr. Shouche for kindly allowing me to temporarily register with him in University of Pune. I would like to thank my M.Sc teachers, who sowed the seeds of research interest in me.

I would also like to thank AITRP co-ordinator and director, Dr. Vinayaka Prasad of Albert Einstein College of Medicine, New York for selecting me and granting me a fellowship to accomplish what technically we were not able to do at NCCS. It was a challenging experience and a good learning for me to work with Dr. Kalpana Ganjam, under AIDS International Training and Research Program (AITRP) at Albert Einstein college of Medicine, New York for the microarray work. Special word of thanks goes to Dr. Peter Lopez at Aaron Diamond AIDS Research Centre, NY, for making sorting of infected cells a reality for us. I highly appreciate Dr. Saibal Dey of Uniformed Services University of the Health Sciences, Bethesda, USA, for his kind help with gifting me two of the most important reagents in the present study.

I would like to duly acknowledge CSIR, India for providing financial assistance in the form of fellowship to conduct the research for this degree.

A whole lot of my dear friends have supported me and made this journey jovial and light. It was only with these people where I released all my stress and frustration. I would like to especially thank Sujit, Prakash, Susham, Ravi, Anagh, Asavari and Rishi who have been with me through good and bad times and would like to let them know that the pleasure of the time spend with them, I will fondly cherish. I highly appreciate the promptness of Sujit, Ravi and Anagh for lending a helping hand any time I needed. Thanks also to Venky, Ajith, Ruchiika, John, Mary, Zhiikai, Masha and an endless list for their invaluable help.

I owe a big deal of thanks to my juniors Manish, Dinesh, Ravi, Manoj, Shalini, Murugaiyan, and the lab mates Archana, Pavithra, Surojit and others who made the lab atmosphere very delightful. Those endless parties, which we waited to extract from anybody and everybody in the lab, were real fun. I would like to thank all of them who always gave way for my work to progress smoothly and be of help at any moment. I would also like to thank Sujata and Devraj for their assistance.

A very big contribution and the driving factor came from my family who has always believed in me and have supported me in my every endeavor. Thanks also to Jiji, Vincent and Juhii for the support. I have always felt secured by the blessing and prayers of my parents, in-laws and well wishers. Even if I wish to express my gratitude to you mom, it is going to be only utterly insignificant, in the unparalleled way; you have carried through in the time of crisis to keep our spirits high and for being a constant source of inspiration, hard work and optimism. Thanks papa for inculcating endurance and making us independent. Thanks to Snehal and Yami for being such amazing and encouraging sisters.

Last but not the least, my dearest Vikrant, I think it would all be incomplete to begin with, without your encouragement, push, undeterred support and love. I don't know how to put in words for your immense patience, composure and wisdom, with which you have hold me up, boosted my morale and instilled optimism in me. I only wonder how you dealt this entire period with a smiling face to see me come through this struggle.

Thank you Lord Shiva for bestowing me with your blessings, for surrounding me by such nice people and to make me believe with your indications that life is worth a good cause.

Jayashree S. Ladha
