In researching and writing this thesis I have received invaluable assistance from different persons and institutions too numerous to list here in full. However, I would like to single out a few of these for special mention and thanks.

First I am grateful to Prof. V. Subramanian, SES, J.N.U. for his scholarly guidance in preparing this thesis. To Prof. V. Subramanian I humbly give the title of Guru. My intellectual debt to him is more than can be expressed in words.

I thank the Dean, SES for providing the necessary facilities. I am thankful to Dr. K.L. Pillai, Dr. U.C. Mishra and M.D. Borkar of BARC, Bombay for providing experimental facilities and taking keen interest in this work. My thanks are due to Mr. Krishna Rao for helping in Computer Programming at N.I.C. New Delhi.

My sincerest thanks must also go to the large number of other scholars and friends who at one point or another have discussed, questioned and criticised the content of this thesis. In this respect Messers Srinivasan, Jayaraman, Bheemalingeswara, Vaidyanathan, Ramanathan, Biksham, Abbas, Anbarasu, Siddaiah, Balakrishnan and Mrs. Rekha deserve special mention.

I am greatly indebted to Dr. Jeevanandam, Mr. Mohan and Mr. Chandrasekar, computer engineers of Engineers India Limited who spent their valuable time with me in making the thesis in an excellent manner.

The technical assistance by Dipankur Sur, Swaminathan and Kanu facilitated me to complete the thesis in time for which I am thankful to them.

Finally I would like to thank several of my friends Messers Murugesan, Selvaganapathi, Ramakrishnan, Mohanasundaram, Sahadevan and other friends who have helped me in one way or another in the final stages of the thesis.

Above all the affection and gratitude shown by my parents, brothers and sisters towards me kindled in me the light of research and academic thirst.

R. Ramesh
