ACKNOWLEDGEMENTS

It is of great pleasure I express my profound sense of gratitude and indebtedness to my beloved guide and mentor Dr. R. Nagabhushanam, Emeritus Scientist, Visiting Professor, Biology Department, Tulane University, New Orleans, Louisiana, U.S.A. and Research Guide in Zoology, Marathwada University, Aurangabad for his suaverlative guidance, magnanimous support, scientific freedom, scholarly advice, constant inspiring encouragement in every phase of my research work, I have no words crystallize my thankfulness for all his benevolent gestures.

I am greatly obliged to Dr. (Mrs.) R. Sarojini, Reader, Department of Zoology, Marathwada University, Aurangabad, M.S., India, for her joint authentic guidance, intellectual discussions, constructive criticism, scholastic supervision, which helped to improve my work. The limitless efforts given by her and the timely encouragements I often had from her are the only reason why this milestone could come to fruition.

I owe much more than I can to my beloved father Shri T.S. R. Krishnamurthy and my mother Smt. T. Syamala, whose love, charisma and blessings have been a source of inspiration, courage and stamina to reach upto
this stage. I am privileged to have had the devoted help of my sister Miss T. Sarmila, who pleasures me in a thousand ways.

I greatly acknowledge Dr. (Mrs.) P.R. Machale and all my colleagues who generously helped me color the mosaic of this piece of work with the tiles of their knowledge, expertise and memories.

I am extremely pleased to extend my heartiest thanks to Nitin Nikam for typing the thesis meticulously and to Dr. A.B. Sapre for preparing excellent execution of microphotographs.

My sincere thanks are due to U.S.I.F. authorities (Project No. NODOT4-QO-90-5) for financial assistance and to the authorities of the Marathwada University for providing all laboratory and Library facilities.
