Acknowledgement

I am eager to express my gratitude to those all who have helped me directly or indirectly at every step.

At the foremost, I would like to extend my sincere gratitude to my thesis supervisor Dr. Rakesh K. Tyagi. His cooperation and concern throughout my PhD was admirable. His exceptional guidance and scientific approach has really helped me to shape my career in research field. I would like to thank him for showing me a new dimension, to work very hard, be patient and persistent in work. His affection and caring attitude like a parent, made me more confident to face the failures that came during my work. His suggestions like updating data book, compiling data, preparing things in advance as a reminder for my research work helped me to overcome the problems and challenges.

I am extremely grateful to Dr. Gaurango Mukhopadhyay, who taught me to do work in disciplined manner in lab. I am also thankful to Dr. Suman K. Dhar and Dr. Chinmay K. Mukhopadhyay for their valuable suggestions and moral support.

I would like to take the opportunity to acknowledge Prof. Kasturi Datta and Prof. Rajendra Prasad for their help and support. I am also thankful to Dr. M.M. Misro for the help in resolving some of experimental artifacts in immunohistology work.

My special thanks to Sanjay for his help and support throughout my work. I am also thankful to him for allowing me to do work in stably expressing AR cell line HepG2 which was developed by him. I would not have completed my work without consistent support and valuable suggestions from lab mates Subodh, Saradhi, Rachna, Sangeeta, Seema, Swagta and my juniors most Bharti and Priyanka. Also, they provided me the family atmosphere where I shared my good and bad days and cherished every moment with them. Monica mam was always with me to resolve social and scientific problems. I cannot forget the company of my friend Subodh with whom I enjoyed a lot. I cherished my free time with younger sister Bharti by reminding the old and mid 1990 Hindi movie songs. Moreover, she cared for every aspect of my well-being. Suggestions from Sangeeta and Priyanka have contributed immensely during the preparation of my thesis. It would not be possible to complete my work without the help from Seema for my RNA work and computer analysis. Rachna was always with me to solve my experimental problems when I was in trouble.

SCMM colleagues always supported and motivated me to achieve my goals. I was always inspired from suggestions by Jagannath, Ashraf and Sanal. I was fortunate to have friends like Parul, Ashish, Ram, Absaar, Dola, Sunil, Navin, Shipra, Sudipta, Nisha, Vikash, Gopal ji, Dhaneshwar, Atul, Sandeep, Vandana, Nupur, Amit, Abhijeet Pallavi, Kavita, Ekta whose sheer presence gave a different meaning to the atmosphere of SCMM. Chaitali mam will always be remembered for her caring nature to me. I would also like to appreciate great friendship with my batch mates Ashish, Ashraf, Sanal, Ujala, Sunil and Aparna during tea party, lunch and dinner in JNU canteen, Mejbaan or
Uduppi. I really enjoyed the best moments of friendly fights between Ujala, Sanal and Subodh where I had to intervene every time.

Nand-ji was always there for me, whenever I needed him for any technical assistance. Rajesh, Deepak, Naresh-ji and Om Prakash furnished the laboratory equipments in working conditions. Asharam was always near me to greet with a smile when entering or leaving the lab.

I would like to thanks Prasad, Mansi and Bhaswati for providing help and assistance whenever I required. Aniruddha sir will always be in my memory who inspired me to work hard and energetically. I had great time with Prasad (Makalu) in JNU hostel night dance parties.

My family has always supported me in all my accomplishments. My parents, my brothers and sisters always provided timely suggestions and motivation all along my career. Also, I wish to acknowledge the strength from my Choubey family at my native place and Majhiyar house members in Rewa who always encouraged me to achieving my goal.

My heartly thanks to Mamta mam for providing me family atmosphere and maternal care whenever I needed. I also enjoyed my pleasant moments with kids-Aamna, Hiya, Vrinda, Jhanvi, and Shruti.

How can I forget my better half Archana (Neetu) whose self-less assistance, moral support and sacrifice helped me completing my work? I gratefully acknowledged her contribution in completion of this thesis. Her friendly nature and encouragement always provided me a constant source of energy. My little cute son Partha was always there to inspire me. His smiling and “cycling activity” made me happy whenever I was tensed. I am very thankful to Ritu didi, Manu and Atul bhaiya who made me conscious about my career.

I would like to thank Pandeyji for their consistent help in animal handling and experiments throughout my research work.

Finally, financial assistance in form of research fellowship from the Council of Scientific and Industrial Research (CSIR), India is duly acknowledged.

Nagendra
