ACKNOWLEDGEMENTS

A pleasant task of reciprocating by words to those who helped directly or indirectly in shaping this thesis is constrained only by a limited space for describing the nature of debts to each one of them. The unseen push I felt whenever I was in trouble makes me kneel down to the Almighty. I am quite convinced that knowledge and intelligence are God given elements and not human achievements.

Although words would not be enough to acknowledge the help of my guide, Dr. Jyoti Divecha, I would make a sincere attempt to find verbal equivalents that can possibly express my gratitude. I will be thankful to her for her invaluable guidance and support. I witnessed her perfectionist approach that boosted my spirit to work towards completion of this work in a flawless manner. Her interest in my work, sincere guidance and support always motivated me. My tenure under her supervision has laid firm foundation and deep insight for my subject.

I express my deep sense of gratitude towards Prof. Praful. A. Patel, the Head of the Department of Statistics, for providing necessary facilities during research work and Prof. Ashok Shanubhogue, Member of Research Committee, Department of Statistics, Sardar Patel University, for his constant encouragement during my research work. My sincere thanks to my revered professors Dr. M. B. Bhatt, Dr. D. P. Raykundaliya and Dr. Mayank Bhatt are due for their valuable suggestions, encouragement and help in several aspects during the study.

I express my sense of gratitude towards Charutar Vidya Mandal and Dr. Nikhil Zaveri, Director and Principal of SEMCOM College, Vallabh Vidyanagar, who whole-heartily permitted me to carry on my research along with my job. I am also thankful to Mr. Chetan Patel, Dr. Nehal Daulatjada and all my colleagues for their encouragement and co-operation during this research work.

I feel highly obliged towards my parents because of whom I could reach where I am today. They have always supported me and sustained my spirit. They proved to be the
ultimate source of inspiration. I am also grateful to my wife Dr. Ankita Tarapara and my daughter Pal for they always believed in me and stood with me in my decisions. Without their patience, support and encouragement I might not have completed this thesis. Words are inadequate to express my gratitude for the moral support from my family members, father in law and mother in law.

I express my cordial thanks to my friends, specially Vishwas, Ankit, Jignesh, Niraj and all other friends whose consistent inquiry regarding my progress in this research compelled me to finish it as early as possible. At the end, I thank one and all who helped directly or indirectly in this task.

Bharat M. Tarapara
