List of Figures

3.1 Contour plots of new RSD with 19 runs $k = 3$.

3.2 Contour plots of Replicated CCD with 36 runs for $k = 3$.

3.3 FDS plots of SPV of new RSDs and replicated CCDs for more than one asymmetrical quantitative factor for 3 factor.

3.4 FDS plots of SPV of new RSDs and replicated CCDs for more than one asymmetrical quantitative factor for 4 factor.

3.5 FDS plots of SPV of new RSDs and replicated CCDs for more than one asymmetrical quantitative factor for 5 factor.

3.6 FDS plots of SPV of new RSDs and replicated CCDs for more than one asymmetrical quantitative factor for 6 factor.

4.1 FDS plots of large and small composite designs for rotatable, spherical, practical and practically efficient alphas for CCD (7, 81, $\alpha$).

4.2 FDS plots of large and small composite designs for rotatable, spherical, practical and practically efficient alpha values for MinResV (7, 47, $\alpha$).

4.3 Spheres of radii $r = 1.39$, $r = 1.56$, $r = 1.682$ with design cube for 3 factor CCD.

4.4 FDS plots of large and small composite designs at four inner radii for CCD(6, 47, 2.4495).

4.5 FDS plots of large and small composite designs at four inner radii for MinResV(6, 37, 2.4495).

4.6 FDS plots of competent large and small composite designs for 6 Factors.

4.7 FDS plots of competent large and small composite designs for 7 Factors.

4.8 FDS plots of competent large and small composite designs for 8 Factors.

4.9 FDS plots of competent large and small composite designs for 9 Factors.

5.1 FDS plot of SPV comparison for 7 factors rotatable CCD and ESCCD with $\alpha = 2.2$ and, rotatable MinResV and ESMinResV with $\alpha = 2.2$.

5.2 FDS plot of SPV comparison for 7 factors spherical CCD and ESCCD with $\alpha = 2.2$ and, spherical MinResV and ESMinResV with $\alpha = 2.2$.

5.3 FDS plot of SPV comparison for 7 factors CCD and ESCCD with $\alpha = 2.2$ and, MinResV and ESMinResV with $\alpha = 2.2$.

5.4 FDS plot of SPV comparison for 9 factors CCD and ESMinResV $\alpha = 2.3$ and, for 10 factors CCD and ESMinResV with $\alpha = 2.3$.
