ACKNOWLEDGEMENT

I have great pleasure in expressing my deep sense of gratitude to Dr. S.S. Pawar, Professor of Biochemistry, Chemistry Department, Marathwada University, Aurangabad, for his valuable guidance, encouragement and keen interest during the course of this project.

I am gratefully indebted to Dr. J.M. Patal, University of Florida, USA, Dr. S.J. Makdija and Dr. C.V. Kauliya for their useful suggestions and help throughout the tenure of this work.

This thesis work would never have been completed to my own satisfaction and perfection without constant help, discussion and encouragement of Dr. V.K. Halde and K.R. Gawai.

My parents and sisters had to sacrifice everything by allowing me to be 'Not at home'!

I also acknowledge kind help of H.P. Bhagat and excellent laboratory assistance of N.N. Bhatang, G.R. Shete, and R.C. Khotkar.

I am highly thankful to my sincere friends, D.S. Joshi, S.L. Sarambeykar, J.S. Bansode, S.R. Akarte, V.V. Shinde, M.Zade, C.B. Chaporkar and I.M. Dhudat, who have helped me in this endeavor, and I hope none will feel slighted by physical impossibilities of listing every name.

The excellent typing assistance of N. Nikam in due course of time is also acknowledged.

Finally, the financial assistance of C.S.I.R. by awarding the fellowship, and authorities of Marathwada University for providing research facilities is also acknowledged.
