

CONTENTS

	<u>Page No.</u>
<u>CHAPTER-I</u>	
General Introduction	1-21
Introduction	1
1.1 Theory	9
1.2 Crystal structure of thermotropic liquid crystals	14
1.3 Monoliquid crystals	15
1.4 Applications	16
1.5 Scope and aim of the work	17
References	19
<u>CHAPTER-II</u>	
Refractive index measurements and X-ray diffraction studies on mesogenic substances: Theoretical backgrounds and experimental techniques	22-40
2.1 Refractive index measurements	22-26
2.1.1 Theory	22
2.1.2 Experimental Procedure	25
2.2 X-ray diffraction study	27-39
2.2.1 Theory and general backgrounds	27
2.2.2 Experimental technique and data analysis	33
References	40
<u>CHAPTER-III</u>	
Experimental results	41-101

	<u>Page No.</u>
3.1 Determination of orientational order parameter from refractive index measurements for a homologous series of cyanobiphenyl alkyl ether	41-61
3.1.1 Introduction	41
3.1.2 Results and discussins	57
3.2 X-ray diffraction and optical studies of three mesogens of a homologous series of alkyl cyclohexyl cyanophenyl pyrimidine	62-99
3.2.1 Introduction	62
3.2.2 Measurements of n_o and n_e	69
3.2.3 X-ray study	69
3.2.4 Results and discussions	77
References	98
 CHAPTER-IV	
The crystal and molecular structure of 5-(4-heptylcyclohexyl)-2-(4-cyanophenyl) pyrimidine	102-138
4.1 Introduction	102
4.2 Diffraction of crystals	102
4.3 Crystal data collection	104
4.4 Intensity data reduction	105
4.5 Unitary and normalized structure factors	110
4.6 Structure determination and refinement	121
4.7 Results and discussions	122
References	136

	<u>Page No.</u>
<u>Chapter-V</u>	
Order disorder pheomena from X-ray diffraction study of monoliquid crystal	139-150
5.1.1 Introduction	139
5.1.2 Experimental procedure	140
5.1.3 Results and discussions	142
References	150
 <u>CHAPTER-VI</u>	
Summary and conclusion	151-155
References	155
List of publications	156-157
<u>APPENDIX</u>	158-174
