Acknowledgements

At the outset let me express my heartfelt sense of gratitude to my supervisor, Dr. Satish K. Gupta, without whose unquivering guidance, support and encouragement this work would not have seen the light of the day. Besides being a continuous source of motivation, Dr. Gupta has seen me through numerous occasions of despair and frustration and helped keep my focus. Being the great scientist that he is, he has been instrumental in helping me incubate the value of discipline and proper planning essential for scientific work. I wish to thank the Director of NII, for his kind help and encouragement. I also thank my august Doctoral Committee members, Dr. Subrata Sinha, Dr. Chandrima Shaha, Dr. Debasisa Mohanty and Dr. Amulya K. Panda for their help and valuable suggestions.

Mr. Akhilesh K. Aggarwal and Ms. Sanju deserve my sincere thanks for helping me with the academic matters. Sh. Satish Sharma is thanked for his help in binding this thesis. Also, I am extremely grateful to Mr. P.S. Rawat for always lending a kind hand to any help required for ordering essential chemicals or reagents.

Working in Reproductive Cell Biology Laboratory, has been a profoundly gratifying and satisfying experience both professionally and personally. I sincerely acknowledge the support and encouragement extended to me by my seniors Sanchita, Pankaj Bansal, Suraj, Sonika and Sangeeta. The company of my juniors Beena, Pankaj Suman, Nutan and Nachiket was a pleasure and I would like to wish all of them a very successful career ahead. Presence of Anurag, Kausiki, Manoj, Prakash, Manish, Manjari, Shiveta and Tripti at various time points over these five years never let monotony invade the ambience of the lab. I take this opportunity to express my pride in being part of this team of budding scientists. I would also like to thank Rajatji and Raghavji for their continuous assistance in the nuances of my work.

I shall always fondly look back at my stay at RSH with friends like Priyadarshini, Divya, Jyoti, Mani, Vineet, Richa and the rest of my batchmates in the coming years of my life. Neelam, Meghna, Jitesh, Shuchi, Anupriya, Sharmishtha, Suvedu, Namrata, Vibhu, Deepa, Sayoni, Jayita, Smriti, Arush, Aalia, Bharti, T.K., Gautam, Rituparna, Arijit, Sweety, Yogeshwar, etc have made my stay in NII unforgettable.

I am obliged to the National Institute of Immunology and Department of Biotechnology, Government of India for providing me financial aid during the course of my thesis.
I am most indebted to my beloved parents for their blessings; constant support and confidence that made me tide through the difficult times. Mama, Dada and Boudi are thanked graciously for always buoying me up. This list would be incomplete without acknowledging the understanding and love that my parents-in-law have displayed for these long years of my absence. Last but not the least, I wish to acknowledge Ratnadeep, who has been a friend, philosopher and guide to me. He has been by my side through thick and thin and has been the source of my strength. Without his unwavering support and belief in me, it would have been impossible for me to reach this stage.
