ACKNOWLEDGEMENT

With the blessings of Almighty and cooperation and support given by the fellow beings, this thesis is in this form. This work is truly a result of cumulative efforts of all my team members.

The efforts put by Dr. Haridwar Singh, Emeritus & Outstanding Scientist (DRDO) and former Director of H.E.M.R.L.; Pune is beyond words, without whose valuable guidance, constant encouragement and support, this work would not have been possible. He took deep interest at every phase of this study and despite his busy schedule he always found time to critically evaluate the results and offer solutions to the problems.

I great fully acknowledge the support and guidelines given by Shri J. S. Gharia, Dr. K. U. B. Rao, Dr.S. N. Asthana et al. and also wish to express my sincere thanks to Dr. (Smt.) V. K. Phadke, Shri V. V. Tadas, and Shri R. K. Sinha et al. for their association with this work. I am highly obliged to Shri P. V. Kamath for his cooperation and guidance in theoretical calculations.

I would most certainly be failing in my duty, were I not mention name of my father Dr. A. C. Srivastava, mother Smt. Savitri Devi, brother Shri Deep Prakash, wife Smt. Anita and children who were constant source of inspiration for each activity related to this work.
There are several others like Shri S. R. Vadali, Shri S. R. Nayak et al. ex colleagues of H.E.M.R.L., Pune and present colleagues of O.F.D.R., Pune whom I owe a deep sense of gratitude and only hope that some of them will forgive me for not mentioning their names individually here purely due to paucity of space.

I express my deep gratitude to the Chairman Ordnance Factory Board, General Manager O.F.D.R., Pune and my seniors for granting the permission for continuing the Ph.D. work and providing support by all possible means.

(VINAY PRAKASH)
