LIST OF FIGURES

Figure 2.1: Perchlorate remediation by the 5 soil samples

Figure 3.1: Representative figure of AFLP protocol

Figure 3.2: Perchlorate-reducing bacteria (in bold) and chlorate-reducing bacteria (marked with an asterisk) bacteria are found in four (alpha, beta, gamma and epsilon) of the five subclasses of the Proteobacteria.

Figure 3.3: Phylogenetic position of A1 isolate

Figure 3.4: Phylogenetic position of A2 isolate

Figure 3.5: Phylogenetic position of A3 isolate

Figure 3.6: Phylogenetic classification with other known perchlorate/chlorate reducing bacteria.

Figure 3.7: Relative position of each of the three isolates

Figure 3.8: A schematic diagram showing the genetic distance prevailing between the three isolates viz. A1, A2 and A3 as was computed using Nei's algorithm (Nei et al 1979)

Figure 4.1: Growth kinetics of perchlorate reducing microbial isolates. A1- *Pseudomonas stutzuri*; A2- *Arthrobacter atrocyaneus*; A3- *Arthrobacter sp ArthraeroA3*

Figure 4.2a: Standardization of media components for *Pseudomonas stutzuri*
Figure 4.2b: Standardization of media components for *Arthrobacter atrocyaneus*

Figure 4.2c: Standardization of media components for *Arthrobacter sp ArthoaeroA3*

Figure 4.3: Perchlorate degradation by selected organisms in enrichment media before optimization. (A1- *Pseudomonas stutzuri*; A2-*Arthrobacter atrocyaneus*; A3-*Arthrobacter sp ArthoaeroA3)

Figure 4.4: Effect of different carbon sources on degradation. (A1- *Pseudomonas stutzuri*; A2-*Arthrobacter atrocyaneus*; A3-*Arthrobacter sp ArthoaeroA3)

Figure 4.5: Effect of pH on degradation by selected bacteria (A1- *Pseudomonas stutzuri*; A2-*Arthrobacter atrocyaneus*; A3-*Arthrobacter sp ArthoaeroA3)

Figure 4.6: Effect of temperature on degradation by selected bacteria (A1- *Pseudomonas stutzuri*; A2-*Arthrobacter atrocyaneus*; A3-*Arthrobacter sp ArthoaeroA3)

Figure 4.7: Effect of trace elements supplement on perchlorate degradation (A1- *Pseudomonas stutzuri*; A2-*Arthrobacter atrocyaneus*; A3-*Arthrobacter sp ArthoaeroA3)

Figure 4.8: Degradation of perchlorate in OEGM (A1- *Pseudomonas stutzuri*; A2-*Arthrobacter atrocyaneus*; A3-*Arthrobacter sp ArthoaeroA3)

Figure 4.9: Degradation by cell free extracts
Figure 4.10: Mix culture effect on perchlorate degradation (A1- *Pseudomonas stutzuri*; A2- *Arthrobacter atrocyaneus*; A3- *Arthrobacter sp ArthoAeroA3*)

Figure 4.11: Perchlorate degradation of 1:100 diluted effluent by selected organisms

Figure 4.12a: Reductase assay of *P.stutzuri*

Figure 4.12b: Reductase assay of *A.atrocyaneus*

Figure 4.12c: Reductase assay of *A.sp.ArthoAeroA3*
