ACKNOWLEDGEMENT

A journey is easier when you travel together. Interdependence is certainly more valuable than independence. This thesis is the result of six years of work whereby I have been accompanied and supported by many people. It is a pleasant aspect that I have now the opportunity to express my gratitude for all of them.

The first person I would like to thank is my supervisor Dr. Devapriya Choudhury. I have been with him since 2002 when I joined him for Ph.D. During these years, I have known Dr. Devapriya as a sympathetic and principle person. His overly enthusiasm and integral view on research and his mission for providing 'only high-quality work and not less', has made a deep impression on me. I owe him lots of gratitude for having me shown this way of research. He could not even realize how much I have learned from him. Besides being an excellent supervisor, Dr. Devapriya was as a good friend to me. I am really glad that I have come to get know Dr. Devapriya in my life.

I would like to thank the faculty of School of Biotechnology who kept an eye on the progress of my work and always were available when I needed their advices. I would like to thank the Dean, School of Biotechnology, Prof. Aparana Dixit for her constant encouragement throughout my stay at the School of Biotechnology. To all the PhD aspiring students, reading this acknowledgement, I strongly recommend her as PhD supervisor. She deserves thanks and best wishes from my heart. Thank you mam.
My colleagues of the School of Biotechnology all gave me the feeling of being at home at work. Special thanks to my lab mates Sujit Kumar and Neda Mirsamadi who were more than my colleagues.

This research has not been supported or funded by any organizations, however, I thank my seniors Dr. Meera Singh, S.K. Dey Biswas and Saroj Gupta at the Indian Council of Medical Research for their immense patience and support during the work. I thank them all for having confidence in me.

I feel a deep sense of gratitude for my family who formed part of my vision and taught me the good things that really matter in life. I am grateful for my brothers, for rendering me the sense and the value of brotherhood. I am glad to be one of them.

In my opinion, doing a PhD is a sacred task and this was definitely one of the best decisions of my life. I am very grateful for Manjit and Bandana, for their love and patience during the PhD period, and providing an additional and joyful dimension to my life.

The chain of my gratitude would be definitely incomplete if I would forget to thank the first cause of this chain, using Aristotle's words, The Prime Mover. My deepest and sincere gratitude for inspiring and guiding this humble being.

Harpreet Singh
