I would first like to thank Dr. Gautam Panda for being a wonderful supervisor with inspirational guidance, encouragement, support and constructive comments. He was always there when I had problems, questions or new ideas during my research life at CDRI. After all, he is a tremendous chemist and teacher from whom I have learned a great deal. I will never forget witnessing his many brilliant ideas. He has given me enough professional freedom and for me, he is also one of the most ambitious persons I have ever met in my whole academic career. It would have been impossible to accomplish this work, without his proficient supervision and determination in the quest for my success. But more importantly, he is a wonderful person. He is one of those people who look first a student, not a chemical reaction, and who cares if that student is ok or not. He has created an extremely positive and encouraging work environment that makes its pleasure to come to work every day. For me personally, he has been very patient and compassionate in allowing me take care of all of my health problems over the past five years whenever needed. For this I will be forever grateful.

I am highly grateful to Dr. C. M. Gupta (past Director) and Dr. R. Tuli (present Director), Central Drug Research Institute, Lucknow for providing the laboratory and excellent library facilities.

I sincerely thank Dr. Chandan Singh, (past HOD) and Dr. A. K. Saxena (present HOD), Medicinal and Process Chemistry Division, for their encouragement, constant inspiration, help and co-operation whenever needed.

I wish to convey my thanks to all the members of SAIF and glass blowing section for their willing help and support.

I also wish to express my sincere thank to Drs., K. Raj, D. P. Sahu, A. K. Misra, A. K. Shaw, Y. S. Prabhakar, Atul Goel, Atul Kumar, D. K. Dikshit and T. Narender for their valuable advice, encouragement and constant inspiration during the entire course of this study.

I am also highly thankful to Drs., U. Bandyopadhyay, V. Chaturvedi, S. Sinha, Y.K. Manju and A. Gaikwad for providing the biological activity results.
I wish to convey my thanks to Dr. A. K. Mandwal, Mrs. V. Mehrotra, Mrs. M. Sharma, Mr. J. C. Rajan, and Mr. A. K. Srivastava for their help, encouragement and support.

It was indeed a great pleasure working with my past and present colleagues Sanjay, Ashok, Sharad, Alok, Ravi, Umasharan, Naveen, Rajesh, Raghava, Vikas, Saquib, Chinmoy, Pintu, Tanveer, Dimpy, Pradeep, Shweta, Biswajit, Somnath, Devesh, Sunil, Saha, Ajay, Nidhi, Raja, Rishi, Hasam, Vandana, Shailesh, Noopur and all other colleagues with whom I enjoyed my research tenure.

The warm and friendly attitude of my colleagues Geetali, Satish, Namita, Anjali, Manish, Shreekant, Raginee, Ravi, Neha, Pratibha, Ankita, Dipti, Manish Sinha, Sandip, Meenakshi and Deepshikha provided a congenital and cheerful atmosphere in the laboratory. My acknowledgement will remain incomplete without recognizing unflinching support, their ever-willing help, stimulating companionship and constructive criticism of my labmates Shagufta, Jitendra, Ajay, Maloy, Krishna, Subal, Ritesh and Sanjit during this period. I extend my heartfelt thanks to them. My special thanks go to Ajay and Maloy for their help to triumph over many tough moments of my personal and professional life in the last five years.

It is impossible to express my sense of gratitude to my parents, elder brother (Dada) and his wife (Boudi) in mere words for their commitment to my ambitions and their selfless sacrifices without which I would not have reached this status. I am invariably full short of words for the support and encouragement rendered by little Aritra. I would also like to thank all my relative and friends, specially my sister (Jhuma di), sister in law (Mr. Kajal Dey) and his family for their support and encouragement.

Finally, financial assistance by CSIR, New Delhi in the form of fellowships (JRF and SRF) is gratefully acknowledged.

(Sajal Kumar Das)
