Preface
Introduction
Materials and Methods
Experiment 1: Dose Response Study
Experiment 2A: Impact of ascorbic acid supplementation on alcohol induced changes in testicular and seminal parameters and its comparison with abstention
Experiment 2B: Impact of ascorbic acid supplementation on alcohol induced alterations in isolated Leydig cell and its comparison with abstention
Experiment 2C: Impact of ascorbic acid supplementation on alcohol induced alterations in testicular microsomes and its comparison with abstention
Experiment 2D: Impact of ascorbic acid supplementation on alcohol induced alterations in HPG-axis and its comparison with abstention
Experiment 2: Discussion
Experiment 3: Impact of ascorbic acid supplementation on alcohol induced changes in mitochondrial bioenergetics and its comparison with abstention
Experiment 4: Impact of ascorbic acid supplementation on alcohol induced apoptosis in testis and its comparison with abstention
