ACKNOWLEDGEMENTS

Foremost, I thank almighty GOD for blessing me to pursue a career in scientific field. I thank GOD for being there for me in a way no one else can. Immeasurable pleasure and deepest appreciation for the great help and kind support are extended to the following persons in one or the other way have contributed in making my PhD study possible.

I would like to express my sincere gratitude to my Supervisor Dr. Atya Kapley, Honorary professor, Centre for Biotechnology and Bioinformatics, School of Life Sciences, Jawaharlal Nehru Institute of Advanced Studies (JNIAS), Secunderabad and Principal Scientist, Council of Scientific and Industrial Research-National Environmental Engineering Research Institute, Nagpur. She has been a constant source of support, advices, encouragement and expert guidance throughout my research. I am extremely grateful for her patience, motivation and enthusiasm that, taken together make her a great mentor.

I would like to acknowledge my gratitude to my Co-Supervisor Dr. A.V.N. Swamy, Retired Professor, Department of Chemical Engineering, Jawaharlal Nehru Technological University Anantapur (JNTUA), Ananthapuramu. I am extremely thankful for his excellent support to complete my PhD.

I am equally grateful to Dr. Kaiser Jamil, Dean, Centre for Biotechnology and Bioinformatics, School of Life Sciences, JNIAS, for her help in initiating my PhD journey. I deeply acknowledge her for the absolute support, caring suggestions, constant encouragement, meticulous scrutiny and scientific approach throughout the course of this thesis.

I would like to thank profusely Dr. D. Swaminadhan, President and Ch. Sujatha Gangadhar, Registrar, JNIAS, for giving me the opportunity to pursue my PhD and also for the facilities provided. I thank my fellow research scholar Dr. Archana Jayaraman, for her kind help and outstanding patience in teaching the statistical analysis. I would like to express my deep gratitude to Dr. Kavita Kakarala, DST-Women Scientist, for all her insights and encouragements. I extend thanks to my
seniors Dr. N. Kirmani, Dr. P. Kalyani, for teaching me the molecular biological techniques and their valuable suggestions in the work. I would like to thank all the faculty of Centre for biotechnology and bioinformatics, especially Mr. M. Asimuddin, Senior Research Associate and my fellow research scholars, namely, Mr. Gandhi Nenavath, Ms. Satyavathi, Ms. Sabeena, Ms. Nasrin Begum. I am also extremely thankful to the administrative staff of JNIAS for all their help with regard to administrative issues.

I would also like to thank JNTUA for providing me an opportunity to pursue my PhD through their MOU with JNIAS. I sincerely thank Prof. S.V. Satyanarayana, Director, Research and Development, JNTUA for his great support, and Prof. D. Subba Rao, BOS chairman, JNTUA and Prof. C. Sudhakar, S.K. University for their valuable suggestions in research review meetings which made me to improve my thesis work. I would also like to express my appreciation to staff of Research and Development, JNTUA for all their help.

I am extremely thankful to Dr. Tata N Rao and Dr. Neha Hebalkar, Centre for Nanomaterials, International Advanced Research Centre for Powder Metallurgy and New Materials, Hyderabad for providing the nanoparticles required for my PhD study.

I owe a deep sense of gratitude to Dr. Rakesh Kumar Sharma, Head, Centre for CBRN Mitigation, Institute of Nuclear Medicine and Allied Sciences, Delhi, for the opportunity gave me to carry out the main part of my thesis related to in vivo studies. I sincerely thank him for spontaneous help, timely suggestions and constructive criticism throughout the study. I also thank staff and research scholars of CBRN, Department of Nuclear Medicine, Division of Radiation Biosciences, Department of Animal house for their kind help and support in completing my work.

I would like to express my special thanks to Dr. Sudip Ghosh, Scientist, Mr. Shankar Anand and Mr. Venkateshwarlu G Yadav, Research scholars, National Institute of Nutrition, Hyderabad for their help in learning the cell culture techniques.

This thesis is simply impossible without my family’s support, love, care and affection. A very special, sincere, respectful thanks to my parents Sri. L. Sudhakar
Reddy and Smt. L. Hampamma, for their co-operation, understanding, constant encouragement and great taking care of my kid permit me to accomplish my ambition of doing PhD. I thank my brother Dr. L. Harivardhan Reddy for the systematic guidance and great effort he put into training me in the scientific field, and also thank my sister-in-law Ms. Haritha for her encouragement throughout the study. I thank my niece Varsha and nephew Nikshipt Reddy who were my stress relievers during thesis writing. I would like to thank my husband Mr. A. Ravikumar Reddy and in-laws Sri. A. Veera Reddy and Smt. A. Lakshmi Devi for their constant support and encouragement throughout the study. Special thanks to my lovely son, Master A. Vibhas Reddy, for his understanding and adorable support right from the beginning of this journey till the successful completion. I extend thanks to my sisters Ms. M. Bhavana and Ms. L. Samyuktha, brother-in-laws Mr. M. Prahlada Reddy and Mr. M. Sudhakar Reddy for their constant support and motivation throughout my PhD journey.

I thank my M.Sc. teacher Dr. C.S. Srinivasa Rao, for his great motivation in initiating me to enter into the research field.

I would like to express my special thanks to all the healthy volunteers who gave their contribution by generously providing their blood samples required for the study. My sincere thanks to the animals (Mice and Rats) for their co-operation to carry out the study and I strongly apologize them for their sacrifice.

Lastly, I apologize to those whom I have failed to mention here and I thank everyone from the bottom of my heart.

L. Sangeetha
