Acknowledgements

It is with great pleasure that I acknowledge all the individuals who have in one way or another contributed and extended their valuable assistance, support and encouragement to me in the preparation and completion of this study. First and foremost, I thank the Almighty God for making a way and helping me take a right step and decision in my life and to complete this work successfully. I feel privileged in expressing my gratitude to the Dean and administration of Kasturba Medical College, Manipal for providing me with the necessary facilities and resources to pursue my research goals.

I owe a debt of gratitude and have a deep sense of respect for my honorable teacher and guide, Dr Girisha KM. I have been fortunate to work under his direct supervision as he has provided me with the most enthusiastic, inspirational and supportive guidance over the last five years. He has helped me at every stage throughout the course of my PhD. Dr Girisha has given me the freedom to work in different projects and has involved me in the grant writing process. I have learned an enormous amount from him, and for this, I will always have the greatest admiration and gratitude for him. He has encouraged me to share my research with the scientific community by allowing me to go to national and international scientific conferences. These opportunities have enabled me to explore more of my field. I am very thankful to him for taking the effort to read the draft of this thesis and provide me with valuable suggestions to improve it.

I am deeply thankful to my co-guide Dr K Satyamoorthy for his kind support, words of strength and motivation, and for giving me an opportunity to use the facilities and resources of School of Life Sciences Centre, Manipal. I am deeply grateful to all the DAC members: Dr Pragna Rao, Dr Shalini Adiga, Dr Pushpa G Kini, Dr PM Gopinath, Dr Benjamin Joseph and Dr Hitesh Shah for their critical comments and suggestions during the DAC meetings which helped me to improve my PhD work.

Over the years I have been privileged to work with Morquio syndrome and GM1 gangliosidosis patients and their families. They have taught me a great deal and I can understand their pain in having these conditions. I am inspired to work harder to help them. I would like to sincerely acknowledge all the patients and their families for their co-operation and participation in this study.
I am thankful to all the clinical collaborators and research groups who have sent us blood samples and clinical data of their patients over the years, and for giving valuable suggestions for the manuscripts related to this study. This PhD thesis would not have been possible without the extramural financial support to this project by the Indian Council of Medical Research (54/6/2009), Government of India, New Delhi. I wish to thank the Indian Council of Medical Research (45/10/2013-CMB/BMS), Government of India, New Delhi and Dr TMA Pai Endowment Chair, Manipal University for providing me a Junior Research Fellowship. I am thankful to Indian Council of Medical Research, New Delhi for awarding me a Senior Research Fellowship. I also thank Science and Engineering Research Board (SERB), Department of Science and Technology for awarded me the young scientist travel grant to attend The European Human Genetics Conference 2013, Paris, France. I am very grateful to European Molecular Biology Organization (EMBO) for awarding me with “EMBO Short Term Fellow Award” to visit and do research work at Manchester Centre for Genomic Medicine, University of Manchester, Manchester, UK.

I reserve a sentiment of gratitude for Dr Ashwin Dalal, Diagnostic Division, Centre for DNA Fingerprinting and Diagnostics, Hyderabad. I remain most indebted to him for giving me an opportunity to train in his lab during the initial days of my PhD. I thank Mr. Jamal for teaching me the protocol of enzyme assays during my visit. I also thank Dr Gowrishankar, Director, Centre for DNA Fingerprinting and Diagnostics, Hyderabad for giving me the opportunity to train in his institute. I thank Dr Nagarajaram, Laboratory of Computational Biology & Bioinformatics Facility, Centre for DNA Fingerprinting and Diagnostics, Hyderabad for performing protein modeling for novel missense mutations in this study.

Working in the Dr Girisha lab has been an unforgettable experience. I found this lab to be a unique blend of extraordinary people, surrounded by whom one would never be missing any flavor of life. I am grateful to all my clinical and laboratory colleagues in the Department of Medical Genetics, Kasturba Medical College, Manipal, Dr Anju Shukla, Dr Solange Lewis, Dr Pranitha Pai, Dr Priyanka, Dr Malavika Hebbar, Mr Vishwas M Shetty, Mrs Shalini S Nayak, Ms Bhavani G, Ms Smrithi Salian, Mr Vinod Kumar, Mr Radhakrishnan, Mr Puneeth, Mr Anil, Ms Sowmya Acharya, Ms Prathika, Mrs Sukanya and Mrs Deepika for sharing their knowledge, expertise, advice and for their
friendly company during my stay in the department. Special thanks to Ms Nitika Langeh, Ms Arya Shambhavi, Ms Devika Sathe and Ms Jhanvi Shah for helping in the proof reading of this thesis and research proposals. I am thankful to them for being always there whenever I needed their help.

I am thankful to the faculties and research scholars of School of Life Science Centre Dr Padmalatha S Rai, Dr Abdul Vahab Saadi, Dr Rajasekhar Moka, Dr Guruprasad KP, Dr Vasudevan TG, Dr Bobby Paul, Dr Manjunath B Joshi, Dr Shama Prasada Kabekkodu, Dr Sanjiban Chakrabarty, Dr Kamalesh Mumbrekar, Dr Reena Reshma D’Souza, Dr Ashok Kumar Bhagavath, Dr Raghavendra Upadhy, Dr Shivakumar BM, Dr Goutham HV, Dr Vijendra Prabhu, Dr Samatha Bhat, Dr Ritu Raval, Dr Harish Rotti, Dr Himanshu Gupta, Dr Vishwanatha, Dr Ravishankara Bellampallia, Dr Neetha John, Dr Phani NM, Dr Mallika Priya, Dr Harpreet Kukreja, Mr Ananthapadmanabha K, Mr Venu S, Mr Manik Vohra, Mr Manjunatha S, Mr Aswath Balakrishnan, Mrs Smitha Bhat, Mrs Malika Nataraj, Mr Vaibhav Shukla, Mr Vinay Koshy Varghese, Mrs Yashvanthi Borkar, Mr Raghu KS, Mr Puspendu Paladhi, Mrs Shettigar Kavitha, Ms Rayzel C Fernandes, Mr Sandeep Mallya and Mr Manoj Bhat for sharing their knowledge, thoughts and their expertise. I express my gratitude to all the technicians and administration of School of Life Science Centre for their help and support.

Special thanks to my parents Mr Mohammed Jaffer Bidchol and Mrs Shiti Mama Bidchol for their support and encouragement in everything that I want to do. They believe that I will achieve great things in my life and career. They endured great pain and sacrifices through all these years with patience for my studies. I am grateful to my brother, sisters and all my relatives for their great support, care, love and affection. Lastly I thank my wife Mrs Hiba Wardha for her unfailing love, never ending support and patience throughout the duration of the PhD.

Abdul Mueed Bidchol
