ACKNOWLEDGEMENT

At the very outset, with high sense of gratitude, utmost indebtedness and respect I would like to express my honest and heartfelt thanks to my research supervisor and mentor Professor Dr. N. Yagnesh Sharma who has been a source of zeal in my academic endeavours. He has a deep and abiding physical and intellectual insight in the area of CFD. I would also like to express my sincere thanks to my research co-guide Professor Dr. D. Anjaiah, for inspiring and supporting me to carry out research in the field of Abrasive water jet machining. With their laudable scientific know-how they have guided me in my research task tirelessly. It is in-fact a matter of immense pleasure that I have worked under their flawless captaincy which is rarely available elsewhere. My research supervisors have left an indelible imprint in my life as my research advisors and as kind persons. They have stood by me throughout my work as a caring guide, an affectionate pal and a philosopher. Their guidance and help at every moment of my research work has made an uphill task easy. I remain indebted to them throughout my life for having led me on the path of research so well.

I thank Manipal Institute of Technology, Manipal University, for providing opportunity for doing research by extending all assistances including conference facilities.

I record my heartfelt indebtedness to Dr. Raviraja, Associate Director (Research & Consultancy), Dr. Sathya Shankar Sharma, Dr. M. Vijaya Kini, and Dr. U. Achutha Kini, for their encouragement during the course of my Ph. D work and for giving valuable inputs during the DAC presentations.

I also wish to thank Dr. B. Siddeswarappa, UBDT College of Engineering, for his kind presence and valuable suggestions during DAC meetings as a subject expert.
I wish to acknowledge my reverential thanks to the Director, Manipal Institute of Technology, Manipal and Dr. S. Divakara Shetty, Head, Department of Mechanical and Manufacturing Engineering for their support and motivation during my research work.

I wish to sincerely thank my good friend Mr. Shivamurthy B, in my department for not only helping me in fabrication of composite materials but also for valuable research inputs.

Special thanks are due in many ways to Dr. K.Vasudeva Karanth, Dr. Satish Shenoy and Mr. Manjunath M. S who helped me during the course of my Ph.D. Last but never the least, I wish to extend my warmest appreciation to my family members and friends for the encouragement extended.

I also wish to acknowledge and thank the Managing Director, MD Corporation, India for readily giving the abrasive water jet nozzle, which helped me to carrying out numerical modelling and simulation. I would also like to acknowledge the Industrial Minerals Corporation for sponsoring the abrasive particles used in this research work.

Date: August 28, 2014
