Acknowledgements

This piece of work will never be accomplished without our God Almighty with His blessings and His power that work within me and also without the people behind my life for inspiring, guiding and accompanying me through thick and thin.

I would like to thank all people who have helped and inspired me during my doctoral study.

First and foremost I would like to express my deep regards for Prof. Asis Datta, Founder director, National Institute for Plant Genome Research, New Delhi for accepting me as a Ph.D. student, providing me an opportunity to work in this institute as well as for the supervision. Words are few in honour of Prof. Datta for his inspiring guidance, encouragement, for his important support and freedom, throughout this work.

I am also grateful to my another Ph.D. supervisor, Dr. Subhra Chakraborty for her keen interest in the project, painstaking efforts, her great efforts to explain things clearly and simply, invaluable guidance, detailed and constructive comments and for providing me freedom at work.

I am highly thankful to Dr. Niranjan Chakraborty for his scientific guidance, moral support and patience at all the stage during the tenure both at bench and desk.

I am highly thankful to my Jijaji, didi, Rajiv bhaiya, Bhabhiji for their support, help, inspiration and making me joyful. I would also like to thank my in laws family to constant encouragement and goodwill.

I am very grateful for my wife Vijeta, for her love and patience during the Ph.D. period. One of the best experiences that we lived through in this period was the
birth of our son Aparajit Sharma (Appu), who provided an additional and joyful dimension to our life mission.

Obviously, I would not be sitting in front of my monitor typing these acknowledgement lines without my Mataji and Pitaji. I owe my parents, Sh. Rajkumar Sharma and Smt. Vijay Laxmi Sharma much of what I have become. I thank them for their love, their support, and their confidence throughout the past. My parents have always put education as a first priority in my life, and raised me to set high goals for myself. They taught me to value honesty, courage, and humility above all other virtues. I have always needed to work hard to achieve my goals in life and they have always been there for me as an unwavering support. I dedicate this work to them, to honour their love, patience, and support during these years. I want to convey my regards to my family members without them I am nothing.

Finally, special thanks go to my parents, my wife and my son. Their support on my scientific studies always encourages me to do my best and to enjoy laboratory life.

I wish to thank my entire extended family for providing a loving environment for me. I want to mention specially name of my chachaji Dr. Pravendra Sharma, who gave me inspiration in childhood to inclined towards science,

The chain of my gratitude would be definitely incomplete if I would forget to thank the first cause of this chain, using Aristotle's words, The Prime Mover.
