

## LIST OF FIGURES

Figure No.		Following page.
2.1	Location of raingauge stations selected for water balance studies	41
3.1	Physiography of Kerala	58
3.2	Distribution of different soil types in Kerala	60
3.3	Vegetation map of Kerala	63
3.4	Climatic classification of Kerala - moisture regime	72
3.5	Climatic classification of Kerala - thermal regime	72
3.6	Area under different land uses - (a) District - wise (b) State	78
3.7	Area under food crops and non-food crops Kerala (1992 - 1993) (a) District - wise (b) State	79
3.8	(a) Productivity of paddy and percentage area under paddy and other food crops Kerala ( District - wise ) (b) Percentage area under paddy and other food crops (Kerala State)	81
3.9	(a) Productivity of coconut and percentage area under coconut and other non-food crops Kerala ( District wise ) (b) Percentage area under coconut and other non-food crops (Kerala State)	85

4.1	Spatial distribution of annual rainfall of Kerala	87
4.2	Spatial distribution of seasonal rainfall of Kerala	88
4.3	Trend aspects of annual rainfall series of Kerala	89
4.4	Yearly march of Index of Moisture Adequacy	90
4.5	Categorization of droughts on an annual basis - Kerala	92
4.6	Severity and duration of drought spells (1982 - 1984)	93
4.7	Yearly march of Moisture Index and climatic types	104
5.1	Observed and predicted monthly coconut production	140
5.2	Observed and predicted Viruppu crop yield	170
5.3	Observed and predicted Mundakan crop yield	179
