Acknowledgment

I wish to confess that it wouldn’t have been possible for me to submit my doctoral degree without the moral and emotional support of many of my colleagues. As the success of every game depends on team work, I believe that submission of my thesis has been made possible by the concerted efforts of many people, the only difference being that unlike in a game the contributions of the team members involved in my thesis completion are not conspicuously visible. At the foremost I would first like to thank my guide Dr. Tapan Chakrabarti who provided me the opportunity to work on an aspect that I was very much excited when I joined his lab. Having done graduation and post graduation in microbiology my tenure as a PhD student in his lab provided me the right blend of commitment, inquisitiveness, patience, excitement and proper frame of mind to work on a problem for a period of almost six years. The most admirable quality of my guide was the freedom of thinking that he provided me in completing my project. His advice, cooperation and thought provoking nature encouraged me in times when I felt disappointed and dejected. It wouldn’t have been possible for me to complete my work without the love, affection, understanding and support of my parents, sister and brother in law who were always there for me at times of desperation. They stood by me at most difficult times and their emotional warmth and tenderness was unparallel. At this moment I would like to remember the Almighty whose blessings are too invaluable to be acknowledged.

I would also like to thankfully acknowledge the former director of the Institute Dr. Amit Ghosh and present director Dr. Girish Sahni for providing me research facilities to carry out my work. There were two people without whose technical help and cooperation I could not have started my work. These were Mr. Younis who helped me immensely during fabrication of drilling equipments and Mr. Ashok Rana whose patient and hard working attitude helped me in setting up the anaerobic workstation in running condition. I feel immense pleasure in thanking Mr. Mayilraj who taught me running the GC machine and some of the basics tips of writing and editing the manuscripts. I must admit that my work could not have been properly completed without the support of Dr. Suresh especially concerning the handling of anaerobic workstation and cultures. I would also like use this opportunity to thank Dr. Prasad and Dr. Ananthpadmanabhan who were always willing to spare their time for suggestions. I would like to avail this opportunity to thank Mr. Deepak who was immensely cooperative in running my sequencing samples. I avail this opportunity to thank Mr. Kapoor and Mr. Sharma of Central Ground Water Board, Chandigarh for their technical advice and contribution during sample collection. I express my gratitude to Dr.
Peter Schumann and Dr. Stackebrandt (DSMZ, Germany) for helping me complete chemotaxonomic work for few strains.

My heartfelt thanks also to my senior Dr. Pradipta Saha with whom I have shared many moments to cherish and remember. He was like a person subordinate to my boss who’s ever helping attitude and encouragement propelled me at difficult times. My thanks are also due to my present and past lab colleagues Malkit ji, Paramjit ji, Upen ji, Sushil, Sudhir, juniors Amit and Puja, Aman, Sukriti, Navneet, Nidhi, Mini, Rashmi, Maniram who provided me a congenial atmosphere in the lab for my work. I owe special thanks to Girija ji and Dr. Ruckmani with whom I shared a special friendship and bonding.

I cannot imagine my stay at IMTECH without the love and support of my friends Arvind, Ganguly and Mandeep with whom I have spent most of my time. I have shared a special relationship with them and most of all earned a life long friendship that made my stay at IMTECH most memorable and pleasurable. My warm feelings to my batch mates Ajit and Narinder who were there with me all the time especially during the final stages of my tenure. I cannot express in words my gratitude to the mess workers especially Nagpal, Ram lal, Pratap, Jacob, Vipin and others who provided healthy and tasty food during my tenure that is an indispensable part of any life for any person.

I would also like to thank the administrative staff of accounts, store and purchase section, the staff of the BIC department and library for their invaluable support. My special thanks to staff of the horticultural department whose immense hard work provided an aesthetically relaxing and fresh environment that made the stay at IMTECH highly pleasurable. Finally I would like to thankfully acknowledge CSIR for providing me the fellowship (award no: 31/50 (159)/2002-EMR-I) and financial support during my stay.

June 2008

S. Krishnamurthi.
