ACKNOWLEDGEMENTS

This is perhaps the most difficult thing I intend to do, i.e., to sincerely thank and express my heartfelt gratitude to everybody who has, in one way or the other, contributed in the successful completion of my thesis. I wouldn’t be doing justice by merely naming everybody who helped me but at the same time it will be too difficult for me to express my sincere thanks in the form of words, I will nonetheless try to make a sincere effort …

Firstly, my heartfelt gratitude to Dr. K. Vijayamohan, my research advisor, for his guidance, fruitful discussions, trenchant critiques, valuable advice, constant support and encouragement throughout the course of this work. I must also mention that he is also a very good teacher & a wonderful research guide with vast knowledge and insight, which are often quite rare. His constant effort to instill us with several, most essential habits, like weekly seminars & group meetings, monthly reports & daily planning, makes me confident to start an independent scientific carrier. He has also trained us to write manuscripts independently and guide the undergraduate students. He is also instrumental in teaching us to effectively communicate with people, to give a better presentation, to efficiently handle multitasking simultaneously and so on. My sincere regards and reverence are for him, forever.

I am grateful to Dr. S. Sivaram, Director, NCL, who gave me an opportunity to work in this prestigious research institute and also to CSIR for financial support. I wish to thank Dr. S. Pal, head of Physical Chemistry Division for allowing me to use all the available facilities in the division.

I would like to offer my sincere thanks to Dr. I. S. Mulla and Dr. K. Sreekumar for their help, support and advice during the course of this study. I also extend my admiration to Dr. P. A. Joy for his valuable suggestions and discussions.
