

## LIST OF FIGURES

Figure No.	Description	Page No.
3.1	Medicinal plants selected for present study from <i>Apocynaceae</i>	56
3.2	Isolation rate of endophytic fungi of four medicinal plant parts of <i>Apocynaceae</i> .	64
3.3	Colonization rate of endophytic fungi isolated from four medicinal plant parts of <i>Apocynaceae</i> .	64
3.4	Endophytic fungi on Potato dextrose agar medium and morphological view under microscope.	70-72
3.4.a	<i>Alternaria</i> sp.	70
3.4.b	<i>Aspergillus</i> sp.	70
3.4.c	<i>Bipolaris</i> sp.	70
3.4.d	<i>Chaetomium</i> sp.	70
3.4.e	<i>Cochliobolus</i> sp.	71
3.4.f	<i>Colletotrichum</i> sp.	71
3.4.g	<i>Curvularia</i> sp.	71
3.4.h	<i>Cylindrocephalum</i> sp.	71
3.4.i	<i>Fusarium</i> sp.	72
3.4.j	<i>Pestalotiopsis</i> sp.	72
3.4.k	<i>Thielavia terricola</i>	72
3.5	Phylogenetic tree constructed based on sequence of <i>Cochliobolus kusanoi</i> and its closest matches in the GenBank sequences.	73
4.1	Antimicrobial activity of endophytic fungi determined by agar plug method.	85
4.2	Antibacterial activity of crude extract of endophytic fungi determined by agar well diffusion method.	92
5.1	<i>Cochliobolus kusanoi</i> on different media	110
5.2	Preparatory RP-HPLC spectrum of the compound isolated from <i>C. kusanoi</i> .	110
5.3	HRESI-MS spectrum of the purified compound isolated from <i>C. kusanoi</i>	113
5.4	FT-IR spectrum of the purified compound isolated from <i>C. kusanoi</i> .	113
5.5	<sup>1</sup> H NMR Spectrum of the purified compound isolated from <i>C. kusanoi</i> .	114
5.6	<sup>13</sup> C NMR Spectrum of the purified compound isolated from <i>C. kusanoi</i> .	114
5.7	HSQC Spectrum of the purified compound isolated from <i>C. kusanoi</i> .	115
5.8	HMBC Spectrum of the purified compound isolated from <i>C. kusanoi</i> .	115

5.9	The Structure and HMBC correlations of oosporein.	116
5.10	ORTEP diagram (drawn at 50% probability ellipsoids at 110 K) of oosporein.	116
5.11	Solid state packing; O-H $\cdots$ O hydrogen bonding between the molecules in compound oosporein from <i>C. kusanoi</i> along C axis.	117
5.12	C-H $\cdots$ $\pi$ interactions interaction and C-H $\cdots$ O hydrogen bonding in the crystal structure of compound oosporein from <i>C. kusanoi</i> along C axis.	117
5.13	Cytotoxicity of oosporein on A549 cell lines	119
6.1	Dose dependent cytotoxic effect of oosporein on MDCK cells.	130
6.2	Dose dependent effects of oosporein on plasma membrane damage.	130
6.3	Effects of oosporein on ROS generation.	133
6.4	Effects of oosporein on Lipid Peroxidation.	133
6.5	Estimation of DNA damage induced by oosporein.	134
6.6	Effects of different concentration of oosporein on nuclear organization of MDCK cells.	134
6.7	Dose dependent effect of oosporein on mitochondrial membrane potential (MMP).	135
6.8	Dose dependent effects of oosporein on oxidative biomarker gene expression of HSP70, Cas3, Cas6 and Cas9 genes quantified by real time PCR.	135
6.9	Dose dependent effects of oosporein on oxidative biomarker gene expression of SOD and CAT genes quantified by real time PCR	136
