ACKNOWLEDGMENTS

At the start of every major work, initially difficulties seem insurmountable. But gradually, as we begin treading on the chosen path with honesty and perseverance we find that GOD is there to help us at each step. I am grateful to ALMIGHTY. I am deeply indebted to my parents who always encouraged me to achieve new heights. Their blessings have also been pivotal to the completion of the present work for which I fail to find words to repay their favor in terms of love and affection.

My heart is brimful of celestial bestowal for my esteemed teacher, my guide Dr. P.K.Suri, Professor (Retd.), Department of Computer Science and Applications, Kurukshetra university Kurukshetra. His untiring and unlimited support, his rational persona, focused guidance, constructive criticism and above all, his availability to me both when I was delighted with the research and when I was despaired of it, motivated me in putting my hundred percent efforts. During these years, I have known Dr. P.K.Suri as a sympathetic and principle centered person. His overall enthusiasm and integral view on the research and his mission for providing high “quality work” has made a deep impression on me. He could not even realize how much I have learned from him. He will always remain constant support, stimulus and foil for me.

I would like to thank Dr. Rajender Nath, Chairman, Department of Computer Science and Applications, Kurukshetra University, Kurukshetra for his administrative support and guidance.

I am grateful to Prof (Dr.) (Mrs.) Pushpa Suri (Retd.), Department of Computer Science and Applications, Kurukshetra University, Kurukshetra for her encouragement, valuable suggestions and for providing homely environment.

I owe my special thank to Dr. Sandeep Maan for his generous cooperation, unconditional support and healthy discussion during the course of research despite of their busy schedule.
I am also thankful to my colleagues, who have always shown a willingness to help all along, whenever I needed during the preparation of my thesis work.

Sometimes the words are too reticent to mark one’s inward feeling and here I am experiencing the same.

I am actually falling short of words to express my deepest sense of appreciation to my better half for extending her unconditional love and support, patiently listening to my endless talk related to my research work, and uplifting my morale during hard times. My sincere appreciations are due to my nine years old son Niket for sparing me to complete this work at the cost of his time.

Finally, I would like to thank all those whose direct and indirect support helped me in completing my thesis in time.

(KARAMBIR)
