ACKNOWLEDGEMENTS

Pursuing a Ph.D. project is a both painful and enjoyable experience. It’s just like climbing a high peak, step by step, accompanied with bitterness, hardships, frustration, encouragement and trust and with so many people’s kind help. When I found myself at the top enjoying the beautiful scenery, I realized that it was, in fact, teamwork that got me there. Though it will not be enough to express my gratitude in words to all those people who helped me, I would still like to give my many, many thanks to all these people.

First of all, I’d like to give my sincere thanks to my honorific supervisor, Dr. Sukhbir Lal Khokra, who accepted me as his Ph.D. student without any hesitation when I presented him my research proposal. Thereafter, he offered me so much advice, patiently supervising me, and always guiding me in the right direction. His encouragement and help made me feel confident to fulfill my desire and to overcome every difficulty I encountered. You have been a tremendous mentor for me. Your advice on both research as well as on my career have been priceless, without your valuable guidance, the work presented in this thesis would not have been possible.

Special thanks are also given to Dr. C.R. Pillai from NIMR, Delhi and Dr. Rajender Kumar from NIPER, Mohali, Punjab, who provide me facilities in their laboratories to carry out in vitro and in silico studies. I’ve learned a lot from him, without their help I could not have finished my dissertation successfully. It is not sufficient to express my gratitude with only a few words.

I also appreciate the advice of the committee members, Dr. A.C Rana, Dean & Director, Institute of Pharmaceutical Sciences, Kurukshetra University, Kurukshetra, Dr. Sunil Kumar, Dr. Dinesh Kumar for their critical comments, which enabled me to notice the weaknesses of my thesis and make the necessary improvements according to their comments.

It is pleasant privilege for me to express my sincere thanks to Mr. Pawan Kaushik, Mrs. Deepika Paliwal, Mrs. Sonia Kohli, Mrs. Archana Sharma, Mrs. Mona Piplani, Mrs. Kiran Yadav, Mr. Pushpinder and Mr. Vikas Sharma for their kind help and support during my work.
There are two people I need to mention especially, Ms. Pramila Thakur and Ms. Nisha Devi, their unselfish help always motivated me each and every step of my dissertation. I owe them both my sincere gratitude for their generous and timely help. 

I am thankful to Chairman, Department of Chemistry, Kurukshetra University, Kurukshetra for providing IR and NMR facilities. I would also like to express my appreciation to all the lab staff and persons who have offered me their time and help when needed.

I gratefully acknowledge University Grants Commission (UGC), New Delhi, to grant me fellowship as JRF during this period, under major research project entitled project “Molecular modelling based designing, synthesis and evaluation of butenolide derivatives as novel antimalarial effective to treat resistant form of parasite and cerebral malaria” F. No. 42-38/2013(SR).

Words cannot express how grateful I am to my mother, father, mother-in-law and father-in-law, for their prayers, understanding and love. Their firm and kind-hearted personality has affected me to be steadfast and never bend to difficulty. They always lets me know that they are proud of me, which motivates me to work harder and do my best. Without their help, I would not have been able to complete much of what I have done and become who I am.

I would like to say thanks to my elder sister Ekta for your wise counsel and sympathetic ear. You are always there for me and younger Samta who spent sleepless nights specially to look after my son Divij, you supported me, in the moments when there was no one to answer my queries, brother Deepender for his continuous support – both spiritually and materially. Your infallible love and support has always been my strength. The patience and sacrifices of you all will remain my inspiration throughout my life.

Finally, I take this opportunity to express the profound gratitude from my deep heart to my beloved husband Gaurav Rathee, for his eternal support and understanding of my goals and aspirations. His love and support without any complaint or regret has enabled me to complete this Ph.D. project.

After him, I am especially thankful to my son DIVIJ. It would be ungrateful on my
part if I thank you in these few words. You are the origin of my happiness. Your little mind can understand very well that your mom was busy in some important work and when I was away, your cute and tender voice on the phone always remind me that I have to work hard even more. I owe my every achievement to my son, Divij Rathee.

As always it is impossible to mention everybody who had an impact to this work, so I would sincerely convey my thanks to all those persons who were contributing their efforts directly or in directly during my work.

May the Almighty God richly bless all of you.

Above all, I praise God, the almighty for providing me this opportunity and granting me the capability to proceed successfully

Deepika Choudhary
