

Table of Contents

Approval sheet.....	v
Student declaration.....	vi
Acknowledgements.....	vii
Abstract.....	ix
Table of contents.....	xi
List of figures.....	xv
List of tables.....	xviii
Abbreviations.....	xix
Chapter 1 Introduction.....	1
1.1 Background and motivation.....	1
1.2 Aim and objectives.....	2
1.3 Scope and significance.....	3
1.4 Limitations of thesis.....	4
1.5 Layout of thesis.....	4
Chapter 2 Review of Literature.....	7
2.1 FSW process.....	7
2.2 FSW tool.....	9
2.2.1 Tool material.....	9
2.2.2 Tool design and geometry.....	26
2.3 Process parameters.....	28
2.3.1 Tool pin offset.....	28
2.3.2 Positioning of Cu and Al.....	29
2.3.3 Rotational speed.....	30
2.3.4 Welding speed or travel speed.....	31
2.3.5 Tool tilt angle.....	32
2.3.6 Downward force or plunge force or axial force.....	32
2.4 Microstructural variations.....	32

2.5	Mechanisms of IMCs phases.....	34
2.6	Mechanical properties	36
2.7	Dissimilar FSW defects.....	41
2.7.1	Voids and tunnel.....	43
2.7.2	Macro and micro crack.....	43
2.7.3	Fragmental defects.....	43
2.7.4	Lack of penetration.....	44
2.7.5	Pores.....	44
2.8	Variants of dissimilar Cu-Al FSW.....	44
2.9	Summary and remarks.....	47
Chapter 3 Materials and Methods.....		49
3.1	Base materials and experimental set-up.....	49
3.2	Experimental method.....	51
3.3	Tool designs and process parameters.....	51
3.3.1	FSW parameters.....	51
3.3.2	Hybrid FSW.....	54
3.4	Testing methods.....	55
3.4.1	Visual, macro examinations and temperature profile.....	55
3.4.2	Tensile testing.....	56
3.4.3	Hardness testing.....	57
3.4.4	Microstructures and advanced characterizations.....	57
3.5	Summary.....	57
Chapter 4 Results and Discussions.....		59
4.1	Taper tool pin profile and tool pin offset	59
4.1.1	Visual examination of surface morphologies	59
4.1.2	Macrographs examinations	61
4.2	Cylindrical tool pin profile and welding speed.....	63
4.2.1	Visual examination of surface morphologies.....	63
4.2.2	Macrographs examinations.....	64

4.2.3	Microstructures.....	65
4.3	Cylindrical tool pin diameter.....	67
4.3.1	Visual examination of surface morphologies.....	67
4.3.2	Macrographs examinations.....	69
4.3.3	Microstructures, scanning electron microscopy and energy dispersive X-ray spectrographs.....	70
4.3.4	Tensile results.....	74
4.3.5	Hardness profile.....	76
4.4	Polygonal pin profile features.....	76
4.4.1	Visual examination of surface morphologies (for Tool 5, Tool 6 and Tool 7).....	78
4.4.2	Macrographs examinations (for Tool 5, Tool 6 and Tool 7).....	79
4.4.3	Microstructures (for Tool 5, Tool 6 and Tool 7).....	80
4.4.4	Tensile results (for Tool 5, Tool 6 and Tool 7).....	82
4.4.5	Hardness profile (for Tool 5, Tool 6 and Tool 7).....	85
4.4.6	Visual examination of surface morphologies (for Tool 8, Tool 9 and Tool 10).....	86
4.4.7	Macrographs examinations (for Tool 8, Tool 9 and Tool 10).....	87
4.4.8	Microstructures (for Tool 8, Tool 9 and Tool 10).....	88
4.4.9	Tensile results (for Tool 8, Tool 9 and Tool 10).....	89
4.4.10	Scanning electron microscopy and energy dispersive X-ray spectrographs...	90
4.4.11	Hardness profile (for Tool 8, Tool 9 and Tool 10).....	94
4.4.12	Summary of welds under the effect of different tool designs.....	94
4.5	Tool tilt angle.....	95
4.5.1	Visual examination of surface morphologies.....	95
4.5.2	Macrographs examinations.....	96
4.5.3	Tensile properties and microstructure.....	98
4.5.4	Hardness and IMCs examination.....	101
4.6	Heating assisted FSW and cooling enhanced FSW.....	104

4.6.1	Visual examination of surface morphologies.....	105
4.6.2	Macrographs examination.....	106
4.6.3	Microstructures and scanning electron microscopy.....	107
4.6.4	Phase identifications.....	111
4.6.5	Tensile properties.....	114
4.6.6	Hardness profile.....	116
Chapter 5	Conclusions and future work.....	119
5.1	Contributions from investigations.....	119
5.2	Conclusions.....	120
5.3	Suggestions for future work.....	124
