Contents

I Introduction
I.1 Review of Literature ......................... 7
I.2 Objectives of the Study ..................... 21
I.3 Methodology and Database .................. 22
I.4 Scope and Limitations of the Study .......... 25
I.5 Organisation of the Study ................... 26

II Industrial Status of Kerala ....................... 35
II.1 Introduction ................................ 36
II.2 The magnitude of Industrialisation in Kerala .... 37
II.3 The structure of Growth .................... 38
II.4 Analysis of Kerala’s industrial base .......... 42
II.5 Empirical evidence of Industrial Deceleration in Kerala .... 44
II.6 Conclusion ................................ 48

III Growth and Structure of Trade Unionism in Kerala ........ 52
III.1 Introduction ................................ 53
III.2 Growth of Trade Unionism - Pre-independence period ........ 53
III.3 The communist influence ................... 58
III.4 Trade Unionism-Post-independence period .......... 60
III.5 Intensity of Unionisation - Present Scenario .......... 62
III.6 Inter-Industry and Inter-District variation in unionism .... 65
III.7 Nature of political involvement of trade unions .......... 67
III.8 Regression model explaining the causes for trade union growth in Kerala .... 71
III.9 Conclusion ................................ 73

IV Industrial Disputes in Kerala – A period wise Analysis .......... 77
IV.1 Introduction ................................ 78
IV.2 Theoretical base and methodology ............ 78
IV.3 Trends in industrial disputes between 1963-93 – A state-wise comparison .... 80
IV.4 Distribution of Industrial Disputes across industries in Kerala .......... 88
IV.5 Explanatory model showing the trends in industrial disputes in Kerala .... 92
IV.6 Conclusion ................................ 96

V Labour Cost Hypothesis–An Empirical Analysis .................... 99
V.1 Introduction ................................ 100
V.2 Industry-wise Analysis .......................... 101
V.2.0.1 Wages and Labour Productivity ............ 101
V.2.0.2 Some technical coefficients across states .... 107
V.2.0.3 The Share of Labour Cost .................. 108
V.2.0.4 Industry-wise Structural Ratios ............. 109
V.3 A Firm-Wise Empirical Analysis ................. 118
V.3.0.2 Reasons for high wages and low productivity .... 7
V.3.0.3 Intensity of Trade Unionism and involvement of 'Anti-mari' .... 7
V.3.0.4 Investment and reasons for industrial disputes in Kerala .......... 9

List of Tables ................................ iii
List of Figures ................................ v
V Labour Cost Hypothesis–An Empirical Analysis

V.1 Introduction ........................................................................................................ 100

V.2 Industry–wise Analysis ....................................................................................... 101
  V.2.0.1 Wages and Labour Productivity .............................................................. 101
  V.2.0.2 Some technical coefficients across states .............................................. 107
  V.2.0.3 The Share of Labour Cost .................................................................... 108
  V.2.0.4 Industry–wise Structural Ratios ............................................................ 109

V.2.1 Impact Analysis .............................................................................................. 113

V.3 A Firm–Wise Empirical Analysis ....................................................................... 118
  V.3.0.1 Nature, Distribution and Performance of the Business Organis-  
    isation ............................................................................................................. 119
  V.3.0.2 Capacity Utilisation .............................................................................. 123
  V.3.0.3 Wage and Wage share in value added .................................................. 124
  V.3.0.4 Reasons for high wages and low productivity ...................................... 128
  V.3.0.5 Intensity of Trade Unionism and Involvement of ‘Atti-mari’  
    activities ........................................................................................................ 131
  V.3.0.6 Shyness in Investment and Reasons for Shifting Industrial Units ....  136

V.3.1 Impact Analysis .............................................................................................. 139

V.4 Conclusion ......................................................................................................... 141

VI The Psychic Cost Analysis .................................................................................. 148

VII Conclusions and Policy Implications ................................................................ 161

Appendix I: Questionnaire for the sample survey ................................................... 168

Appendix II: Questionnaire for the scalogram analysis .......................................... 179

BIBLIOGRAPHY .................................................................................................... 180

1 Trends in wages and labour productivity in Kerala’s SSI sector (in Rs.) ........ .... 102
2 Share of wages in the value added in SSI sector (in %) ....................................... 103
3 Relative change in wages and value added per worker (SSI sector) (Base - 1970- 
   71 = 100) ......................................................................................................... 104
4 Sharewise changes in wages per worker and value added per worker in small  
   scale sector ....................................................................................................... 106
5 Some technical coefficients in major states (SSI sector) - 1985–86 ................ 107
6 Industrial cost structure in SSI sector of major states - 1985-86 .................... 109
7 Structural ratio in industries for small scale sector Kerala and India (1985-86)  
   .......................................................................................................................... 111
8 Wage – productivity relationship in small scale sector in Kerala .......... 112
9 Results of regression analysis of wages of all Industries of small scale sector in  
   Kerala (Time series) ....................................................................................... 115
10 Results of regression analysis of wages – all Industries – (crossection) small  
    scale sector in Kerala ..................................................................................... 118
