

2.2.1.5	Non-templated synthesis of Ferrierite	36
2.2.2	Synthesis of ferrisilicate analog of Ferrierite	36
2.2.2.1	Al+Fe-FER (Fe-FER-I series)	37
2.2.2.2	Fe-FER (Fe-FER-II series)	37
2.2.3	Synthesis of titanosilicate analog of Ferrierite	38
2.3	Characterization	39
2.3.1	x-ray diffraction	39
2.3.2	Scanning electron microscopy	40
2.3.3	Infrared spectroscopy	40
2.3.4	Thermal analysis	40
2.3.5	Sorption measurements	40
2.3.6	Diffuse reflectance (UV-vis) spectroscopy	41
2.3.7	Chemical analysis	41
2.4	Results and Discussion	41
2.4.1	Synthesis of Al-FER	41
2.4.1.1	Synthesis of Al-FER with pyrrolidine	41
2.4.1.1.1	Kinetics of ferrierite crystallization	43
2.4.1.1.2	Effect of SiO ₂ /Al ₂ O ₃ molar ratio in presence of HClO ₄ media	48
2.4.1.2	Synthesis of Al-FER with Tetramethylammonium hydroxide and in absence of template	50
2.4.1.3	Synthesis of ferrierite in AOT/Pyrrolidine system	52
2.4.1.3.1	Role of AOT	55
2.4.2	Synthesis of Ferrisilicate analog of Ferrierite (Fe-FER)	55
2.4.3	Synthesis of Titanosilicate analog of Ferrierite (TS-FER)	58
2.5	Conclusion	62
2.6	References	63

Chapter III: Characterization of Ferrierite.

3.1	Introduction	65
3.2	Experimental	65
3.2.1	Electron Spin Resonance	65
3.2.2	Mössbauer Spectroscopy	66
3.2.3	Nuclear Magnetic Resonance	66
3.2.4	Temperature Programmed Desorption	66
3.2.5	Isopropanol decomposition	66
3.3	Results and Discussion	68
3.3.1	Aluminosilicate of FER type structure	68
3.3.1.1	Al-FER (Pyrrolidine template)	68
3.3.1.1.1	X-ray Diffraction	68
3.3.1.1.2	Thermal analysis	68
3.3.1.1.3	Scanning Electron Microscopy	71
3.3.1.1.4	Sorption Studies	71
3.3.1.1.5	Framework Infrared Spectra	71
3.3.1.1.6	Temperature Programmed Desorption	73
3.3.1.1.7	Isopropanol Decomposition	78

3.3.1.2	Al-FER (AOT)	78
3.3.1.2.1	X-ray Diffraction	78
3.3.1.2.2	Thermal analysis	78
3.3.1.2.3	Scanning Electron Microscopy	82
3.3.1.2.4	Framework Infrared Spectra	82
3.3.2	Ferrisilicate analog of Ferrierite	82
3.3.2.1	X-ray Diffraction	82
3.3.2.2	Thermal analysis	84
3.3.2.3	Sorption Studies	84
3.3.2.4	UV-vis Spectroscopy	84
3.3.2.5	Framework Infrared Spectroscopy	86
3.3.2.6	Scanning Electron Microscopy	86
3.3.2.7	Mössbauer Measurements	89
3.3.2.7.1	Mössbauer Measurements on Fe-FER	89
3.3.2.7.2	Mössbauer Measurements on Al+Fe-FER	93
3.3.2.7.3	Interpretation of Mössbauer Spectra	95
3.3.2.7.4	Indications for the presence of Fe _{lattice} -O-Fe _{extraframework} pairs	97
3.3.2.7.5	Comparison of Fe-FER with Al+Fe-FER	98
3.3.2.8	ESR spectroscopy	99
3.3.3	Titanosilicates (TS-FER)	101
3.3.3.1	X-ray Diffraction	101
3.3.3.2	Thermal Studies	101
3.3.3.3	UV-vis Spectroscopy	101
3.3.3.4	Framework IR	101
3.3.3.5	Scanning Electron Microscopy	105
3.4	NMR studies on Ferrierite	105
3.4.1	Aluminosilicates	105
3.4.2	Si-FER and Ti-FER	109
3.5	Conclusion	114
3.6	References	116

Chapter IV: Catalysis on Ferrierite.

4.1	Introduction	119
4.2	Acid Catalyzed reactions	119
4.2.1	Xylene isomerization	119
4.2.1.1	Mechanism of xylene isomerization	120
4.2.2	Toluene methylation	123
4.2.2.1	Mechanism of Toluene methylation	124
4.3	Ferrierite	125
4.4	Experimental	127
4.4.1	Materials	127
4.4.1.1	Pt exchanged ferrierite	127
4.4.1.2	Dealuminated ferrierite	127
4.4.1.3	La+Pt ferrierite	128
4.4.1.4	Catalyst with binder	128

4.4.2	Catalytic procedure	128
4.5	Isomerization of m-xylene	129
4.5.1	Meta-xylene isomerization on Al-FER	129
4.5.1.1	Effect of temperature	131
4.5.1.2	Effect of WHSV	133
4.5.2	Meta-xylene isomerization on steamed ferrierrite	134
4.5.3	Meta-xylene isomerization on Pt exchanged ferrierite	136
4.5.4	Meta-xylene isomerization on La+Pt exchanged ferrierite	137
4.5.5	Meta-xylene isomerization high pressure	137
4.5.6	Meta-xylene isomerization on H/FWT + 0.1% Pt	139
4.5.7	Meta-xylene isomerization on ferrierite synthesized in AOT	142
4.5.8	Meta-xylene isomerization on H-FER (perchloric acid)	142
4.5.9	Meta-xylene isomerization on Fe-FER	143
4.5.10	Meta-xylene isomerization on Fe-FER in hydrogen flow	145
4.5.11	Meta-xylene isomerization - comparison	146
4.5.12	Kinetics of meta-xylene isomerization on H-FER	149
4.5.13	Effect of dilution on meta xylene isomerization over H-FER	149
	(a) Ethyl benzene dilution	
	(b) n-hexane dilution	
4.5.14	Isofeed study	151
4.6	Toluene Alkylation	155
4.6.1	Toluene methylation on H-FER	155
4.6.1.1	Effect of temperature	155
4.6.1.2	Effect of WHSV	157
4.6.1.3	Effect of feed mole ratio	158
4.6.2	Toluene methylation on Fe-FER	159
4.6.2.1	Effect of temperature	161
4.6.2.2	Effect of WHSV	162
4.6.2.3	Effect of feed mole ratio	163
4.6.3	Toluene methylation - Comparison	165
4.7	Epoxidation	165
4.7.1	Epoxidation on TS-FER	165
4.7.2	Experimental setup	166
4.7.2.1	Allyl alcohol epoxidation	166
4.7.2.2	Styrene epoxidation	166
4.7.3	Results and Discussion	167
4.7.3.1	Allyl alcohol epoxidation	167
4.7.3.1.1	Effect of Temperature	167
4.7.3.1.2	Effect of Solvent	168
4.7.3.1.3	Mechanism	169
4.7.3.2	Styrene Epoxidation	170
4.7.3.2.1	Effect of temperature and pressure	170
4.7.3.2.2	Effect of solvent	171
4.8	Hydroxylation on Fe-FER	172
4.8.1	Experimental	172
4.8.2	Results and Discussion	173

4.8.2.1	Phenol hydroxylation on Fe-FER	173
4.8.2.2	Benzene hydroxylation on Fe-FER	174
4.9	Conclusion	176
4.10	References	178
 Chapter V: Summary.		
5.1	Introduction	181
5.2	Synthesis and Characterization of Ferrierite	181
5.3	Catalysis on Ferrierite	184
