Acknowledgements

At the completion of the thesis work, my heart praises the Lord; my soul is glad because of God my Savior, for he has remembered me, his lowly servant (Luke 1:47).

I thank my Lord for giving me Professor Shridhar R. Gadre as my research guide. He is special in the eyes of the Lord. I am thankful to my sir for his untiring support and motivation at every instant of life, physically or virtually, wherever he may be! His planned life itself is an inspiration for my research. In the MSc. classes he used to call me 'Jose' and during Ph.D. days 'Jovan'. Now the identity is complete, incubation period is over and is the time to come out of his wings.

Ask, and it will be given to you; seek, and you will find; knock, and the door will be opened to you (Matthew 7:7). This is the passage Lord has given me in a difficult moment. My research was completely rooted on this Bible worse. I thank the Lord for his constant help and inspiration. I remember mother Mary for the constant intercessions and presence during the Ph. D. days.

I express my gratitude to all the heads of the Department of Chemistry over the years, for their help and facilities. I am thankful to Council of Scientific & Industrial Research (CSIR) and Centre for Development of Advanced Computing (C-DAC) for scholarships. Moreover, I thank C-DAC for their generous support by facilitating super computing facility.
