LIST OF TABLES

2.1 Growth Rates of Industrial Production
2.2 Estimates of Rates of Industrial Growth
2.3 Annual Compound Growth Rates of Production and Value Added in Agriculture and Industry
3.1 Inter-Industry Coefficient Table, India, 1979-80.
3.2 Backward and Forward Linkages
3.3 Percentage Distribution of Inputs in Different Sectors
3.4 Percentage Distribution of Major Industrial Inputs Consumed in Agricultural Sector (as Percentage of total inputs consumed)
3.5 Net Output, Net Imports, Net Availability of Foodgrains
3.6 Terms of Trade between Agriculture and Non-Agriculture
3.7 Shares and Annual Compound Rates of Growth of Value Added, Output and Employment in Organized Manufacturing: All India
3.8 Annual Compound Rates of Growth of TFP in Organized Manufacturing during 1976-77 to 1987-88 (All India).
3.9 Regression Results of Model \( \log v_t = \log a_0 + a_1 \log L_t + b_1 \log k(t) \) for the Period 1976-77 to 1987-88 (All India).
3.10 Trends in Gross Fixed Capital in Public Sector
3.11 Composition of Public Investment
4.1 State and All India Estimates of Per Capita: Growth Rates and Ranks, 1960-61 to 1987-88.
4.2 SDP: State Relatives of Per Capita
4.3 State and All India Estimates of Per Capita Originating in Primary Sector: Growth Rates and Ranks, 1960-61 to 1987-88.

4.4 State and All India Estimates of Per Capita originating in Secondary Sector: Growth Rate and Ranks, 1960-61 to 1987-88.

4.5 Tertiary Sector: Per Capita, Growth Rates and Ranks 1960-61 to 1987-88

4.6 Primary Sector: State Relatives of Per Capita

4.7 Tertiary Sector: State Relatives of Per Capita

4.8 Per Capita State Product Inequalities by Sectors

4.9 State-wise Sectoral Share in S.D.P.

4.10 State and All-India Rates of Growth of SDP by Sectors, 1960-61 to 1987-88

4.11 Secondary Sector: State Relatives of Per Capita

4.12 Manufacturing: State Relatives of Per Capita

4.13 Manufacturing: Per Capita Growth Rates and Ranks 1960-61 to 1987-88

4.14 Share of Manufacturing in SDP, 1960-61 to 1987-88

4.15 Organized Manufacturing: State Relatives of Per capita

4.16 Organized Manufacturing: Per Capita Growth Rates and Ranks, 1960-61 to 1987-88

4.17 Unorganized Manufacturing: State Relatives of Per Capita

5.1 Manufacturing as percentage of Net Domestic Product (at 1970-71 Prices)

5.2 Shares and Annual Compound Growth Rates of Value Added and Output in Organized Manufacturing.

5.3 Shares of Industrial Groups in Gross Value Added Originating in Organized Manufacturing in State Totals

5.4 Shares of Industrial Groups in Gross Value Added Originating in Organized Manufacturing in All India Totals

5.5 Compound Rates of Growth of Value Added and Output for the Period 1976-77 to 1987-88

5.6 State-wise Specialisation Coefficients

5.7 State-wise Location Quotients

5.8 State-wise Location Quotients

5.9 State-wise Location Quotients

5.10 Regression Results of Model for the Period 1976-77 to 1987-88: \( \log v = \log a_0 + b_1 \log L + b_2 \log k \) for Aggregate Organized Manufacturing.

5.11 Aggregate Organized Manufacturing: Time Series Regression Results of Model \( \log v = a_0 + b_1 \log L + b_2 \log k + c_t \) for the period 1976-77 to 1987-88

5.12 Annual Compound Growth Rates of TFP in Aggregate Organized Manufacturing

5.13 Annual Compound Rates of Growth of Value Added in Organized Manufacturing and Agriculture over 1976-77 to 1987-88
5.14 Time Series Regression Results of Value Added in Organized Manufacturing as a Function of the Value Added lagged by one year in Agriculture during 1976-77 to 1987-88.

5.15 Per Capita Electricity Consumption (Megawatt)

5.16 Surfaced Roads in Km per Lakh Population in India

5.17 Mean, S.D., C.V. of Mandays Lost and Correlation Coefficient between Mandays Lost and Organized Manufacturing Income during 1976-77 to 1987-88

5.18 Annual Compound Rates of Growth of Output, Employment and Simple Elasticity of Employment in Organized Manufacturing

6.1 Share of Agro-based Industries in Value Added Originating in Organized Manufacturing in State Totals-I

6.2 Share of Agro-based Industries in Value Added Originating in Organized Manufacturing in State Totals-II

6.5 Cross Section Rank Correlation between Rates of Growth of Value Added and Share of Wages in Value Added: Agro-based Industries.

6.6 Cross Section Rank Correlation between Rates of Growth of Value Added and Per Worker Real Wages: Agro-based Industries.
6.7 Rank Correlation between Wage Rates (W/L) and Productivity Rates (V/L) across the States: Agro-based Industries - 1976-77.

6.8 Cross-Section Regression Results of Per Worker Wages as a Function of Labour Productivity: Agro-based Industries - 1976-77.

6.9 Cross-Section Regression Results of Per Worker Wages as a Function of Labour Productivity: Agro-based Industries; 1987-88.

6.10 Cross-Section Regression Results of Rates of Growth of Per Worker Wages as a Function of Labour Productivity (Rates of Growth): Agro-based Industries.

6.13 Cross-Section Regression Results of Rates of Growth of Labour Productivity as a Function of Rates of Growth of Value Added.

6.14 Regression (Cross Section) Results of the Rates of Growth of Value Added as a Function of the Rates of Growth of Labour Productivity: Agro-based Industries.

6.15 Regression Results of Rates of Growth of Value Added as a Function of Rates of Growth of TFP (Translog) ABIV (g.r.) = \( a_0 + a_1 \text{TFP}_{TL} \): Agro-based Industries.

6.16 Agro-based Industries: Time Series Regression Results of Model \( \log v = \log a_0 + a_1 \log L + b_1 \log k \) for the period 1976-77 to 1987-88.
6.17 **Agro-based Industries**: Time Series Regression Results of Model \( \log v = \log a_0 + a_1 \log L + b_1 \log k + C_t \) for the Period 1976-77 to 1987-88.

6.18 **Annual Compound Rate of Growth of Agricultural Production and Value Added in Agriculture During 1976-77 to 1987-88.**

6.19 **Annual Compound Rates of Growth of TFP for the period 1976-77 to 1987-88: Agro-based Industries**

6.20 **Shares and Annual Compound Growth Rates of value Added, Output and Employment: Food Product Industries**

6.21 **Food Products**: Time Series Regression Results of Model \( \log v = \log a_0 + a_1 \log L + b_1 \log k \) for the period of 1976-77 to 1987-88.

6.22 **Annual Rates of Growth of TFP for the period of 1976-77 to 1987-88: Food and Beverages**

6.23 **Shares and Annual Compound Growth Rates of Value Added, Output and Employment: Beverages, Tobacco and products.**

6.24 **Beverages, Tobacco and Products**: Time Series Regression Results of Model \( \log v = \log a_0 + a_1 \log L + b_1 \log k \) for the period of 1976-77 to 1987-88.

6.25 **Shares and Annual Compound Growth Rates of Value Added, Output and Employment: Cotton Textile Industry.**
6.26 Cotton Textiles: Time Series Regression Results of Model: \( \log v = \log a_0 + a_1 \log L + b_1 \log k \) for the period 1976-77 to 1987-88.

6.27 Annual Compound Rates of Growth of TFP for the period of 1986-87 to 1987-88: Cotton and Wool

6.28 Shares and Annual Compound Growth Rates of Value Added, Output and Employment: Wool, Silk and Synthetic Fibre Textiles.

6.29 Shares and Annual Compound Growth Rates of Value Added, Output and Employment: Jute, Hemp and Synthetic Fibre Textiles.

6.30 Wool, Silk and Synthetic Fibre Textiles: Time Series Regression Results of Model \( \log v = \log a_0 + a_1 \log L + b_1 \log k \) for the period 1976-77 to 1987-88.

6.31 Leather and Fur Products: Time Series Regression Results of Model \( \log v = \log a_0 + a_1 \log L + b_1 \log k \) for the period 1976-77 to 1987-88.

6.33 Shares and Annual Compound Growth Rates of Value Added, Output and Employment: Textile Products

6.34 Shares and Annual Compound Growth Rates of Value Added, Output and Employment: Wood and Wood Products
6.35 Jute, Hemp and Synthetic Fibre Textiles: Time Series Regression Results of Model \( \log v = \log a_0 + a_1 \log L + b_1 \log k \) for the period 1976-77 to 1987-88.

6.36 Textile Products: Time Series Regression Results of Model \( \log v = \log a_0 + a_1 \log L + b_1 \log k \) for the period 1976-77 to 1987-88.

6.38 Shares and Annual Compound Growth Rates of Value Added, Output and Employment: Leather and Fur Products.

6.39 Wood and Wood Products: Time Series Regression Results of Model \( \log v = \log a_0 + a_1 \log L + b_1 \log k \) for the period 1976-77 to 1987-88.

6.40 Paper and Paper Products: Time Series Regression Results of Model \( \log v = \log a_0 + a_1 \log L + b_1 \log k \) for the period 1976-77 to 1987-88.

6.43 Regression Results of the Rate of Growth of Employment \((L)\) as a Function of the Rate of Growth of Capital Intensity \((K/L)\): Agro-based Industries.
6.44 Regression Results of the Rates of Growth of Employment as a Function of the Rate of Growth of Real Wages per worker across the states: Agro-based Industries.

6.45 Regression Results of the Rate of Growth of Employment as a Function of the Rate of Growth of Value Added, Capital Intensity and Per Worker Real Wages across the States: Agro-based Industries.

7.1 Share of Petro-chemical and Mineral-based Industries in Value Added originating in Organized Manufacturing in State Totals.

7.2 Petro-Chemical and Mineral-based Industries: Shares and Annual Compound Rates of Growth of Value Added, Output and Employment.

7.3 Rubber, Plastic, Petroleum and Coal Products: Shares and Annual Compound Rates of Growth of Value Added, Output and Employment.

7.4 Chemical and Chemical Products Industries: Shares and Annual Compound Rates of Growth of Value Added, Output and Employment.

7.5 Non-metallic Mineral Products Industries: Shares and Annual Compound Rates of Growth of Value Added, Output and Employment.
7.6 Regression Results of the Rates of Growth of Value Added as a Function of the Rates of Growth of Labour Productivity across the States: Petro-Chemical and Mineral-based Industries.

7.7 Rank Correlation between Rates of Growth of Value Added and the Share of Wages across the States: Petro-Chemical and Mineral-based Industries.

7.8 Rank Correlation between Rates of Growth of Value Added and the per worker Real Wages across the States: Petro-Chemical and Mineral-based Industries.

7.9 Rank Correlation between Per Worker Wages (W/L) and Per Worker Productivity (V/L) across the States: Petro-Chemical and Mineral-based Industries.

7.10 Cross-Section Regression Results of per worker Real Wages as a Function of Labour Productivity Petro-Chemical and Mineral-based Industries.

7.11 Cross Section Regression Results of Per Worker Productivity as a Function of Capital Intensity: Petro-Chemical and Mineral-based Industries.

7.12 Cross-Section Regression Results of the Rates of Growth of Value Added on the Rates of Growth of Total Factor Productivity: Petro-Chemical and Mineral-based Industries.

7.14 Annual Compound Rates of Growth of TFP for the Period 1976-77 to 1987-88: Mineral and Aggregate PCMI.

7.15 Time Series Regression Results of Model \( \log v(t) = \log a_0 + a_1 \log L(t) + b_1 \log k(t) \) for the period 1976-77 to 1987-88: Petro-Chemical and Mineral based Industries.

7.16 Time Series Regression Results of Model \( \log v(t) = \log a_0 + a_1 \log L(t) + b_1 \log k(t) + c_t \) for the period 1976-77 to 1987-88: Petro Chemical and Mineral based Industries.

7.17 Time Series Regression Results of Model \( \log v(t) = \log a_0 + a_1 \log L(t) + b_1 \log k(t) \) for the period 1976-77 to 1987-88: Rubber, Plastic, Petroleum and Coal Products.

7.18 Time Series Regression Results of Model \( \log v(t) = \log a_0 + a_1 \log L(t) + b_1 \log k(t) \) for the period 1976-77 to 1987-88: Chemical and Chemical Products Industries.

7.19 Time Series Regression Results of Model \( \log v(t) = \log a_0 + a_1 \log L(t) + b_1 \log k(t) \) for the period 1976-77 to 1987-88: Non-Metallic Mineral Products Industries.
7.20 Cross-Section Regression Results of the Rates of Growth of Employment as a Function of the Rates of Growth of Value Added: Petro-Chemical and Mineral-based Industries.

7.21 Cross-Section Regression Results of the Rates of Growth of Employment as a Function of the Rates of Growth of Capital Intensity: Petro-Chemical and Mineral-based Industries.

7.22 Cross-Section Regression Results of the Rates of Growth of Employment as a Function of the Rates of Growth of Real Wages Per Worker: Petro-Chemical and Mineral-based Industries.

7.23 Cross-Section Regression Results of the Rates of Growth of Employment as a Function of the Rates of Growth of Value Added, Capital Intensity and Per Worker Real Wages: Petro-Chemical and Mineral-based Industries.

7.24 Regression Results of Rates of Growth of Labour Productivity as a Function of Rates of Growth of Value Added Across the States.

8.1 Share of Metal-based Industries in Value Added originating in Organized Manufacturing in State Total.

8.2 Aggregate Metal-based Industries: Shares and Annual Compound Rates of Growth of Value Added, Output and Employment for the period 1976-77 to 1987-88.
8.3 Metal-based Industries: Time-Series Regression Results of Model $\log v(t) = \log a_0 + a_1 \log L(t) + b_1 \log k(t)$ for the period 1976-77 to 1987-88.

8.4 Metal-based Industries: Time Series Regression Results of Model $\log v(t) = \log a_0 + a_1 \log L(t) + b_1 \log k(t) + c_t$ for the period 1977-78 to 1987-88.

8.5 Regression Results of the Rates of Growth of Value Added as a Function of the Rates of Growth of Labour Productivity across the States: Metal-based Industries.

8.5.1 Regression Results of Rates of Growth of Labour Productivity as a Function of the Rates of Growth of Value Added across the States: Metal-based Industries.

8.6 Rank Correlation between the Rates of Growth of Value Added and the Share of Wages in Value Added across the States: Metal-based Industries.

8.7 Rank Correlation between the Rates of Growth of Value Added and the Per Worker Real Wages across the States: Metal-based Industries.

8.8 Rank Correlation between the Per Worker Wages and Per Worker Productivity across the States: Metal-based Industries.

8.9 Regression Results of Per worker Wages as a Function of the Per Worker Productivity across the States: Metal-based Industries.
8.10 Regression Results of the Per Worker Productivity as a Function of Capital Intensity across the States: Metal-based Industries.

8.11 Regression Results of the Rates of Growth of Value Added as a Function of the Rates of Growth of Total Factor Productivity Across the States: Metal-Based Industries

8.12 Regression Results of the Rates of Growth of Employment as a Function of the Rates of Growth of Value Added across the States: Metal-based Industries.

8.13 Regression Results of the Rates of Growth of Employment as a Function of the Rates of Growth of Capital Intensity across the States: Metal-based Industries.

8.14 Regression Results of the Rates of Growth of Employment as a Function of the Rates of Growth of Real Wages Per Worker across the States: Metal-based Industries.

8.15 Regression Results of the Rates of Growth of Employment as a Function of the Rates of Growth of Value Added, Capital Intensity and Real Wages Per Worker across the States: Metal-based Industries.

8.17 Metal Products and Parts: Shares and Annual compound rates of growth of value added, output and employment for the period 1976-77 to 1987-88.

8.19 Electrical Machinery and Appliances: Shares and Annual Compound rates of growth of value added, output and employment for the period 1976-77 to 1987-88.

8.20 Transport Equipment Industries: Shares and Annual Compound rates of growth of value added, output and employment for the period 1976-77 to 1987-88.

8.21 Basic Metal and Alloy Industries: Time Series Regression Results of Model \( \log v(t) = \log a_0 + a_1 \log L(t) + b_1 \log k(t) \) for the period 1976-77 to 1987-88.

8.22 Metal Products and Parts Industries: Time Series Regression Results of Model \( \log v(t) = \log a_0 + a_1 \log L(t) + b_1 \log k(t) \) for the period 1976-77 to 1987-88.

8.23 Machinery and Machine Tools Industries: Time Series Regression Results of Model \( \log v(t) = \log a_0 + a_1 \log L(t) + b_1 \log k(t) \) for the period 1976-77 to 1987-88.
8.24 Electrical Machinery and Appliances Industries: Time Series Regression Results of Model
\[ \log v(t) = \log a_0 + a_1 \log L(t) + b_1 \log k(t) \]
for the period 1976-77 to 1987-88.

8.25 Transport Equipment Industries: Time Series Regression Results of Model
\[ \log v(t) = \log a_0 + a_1 \log L(t) + b_1 \log k(t) \]
for the period 1976-77 to 1987-88.

8.26 Annual compound Rates of Growth of TFP for the period 1976-77 to 1987-88: Basic Metal and Metal Products.

8.27 Annual Compound Rates of Growth of TFP for the period 1976-77 to 1987-88: Machinery and Electrical Industries.
